Teachers and lecturers

Guide classes, set assignments and review learning

You will be able to run a class and help students find their work and feedback.

READ • TRY • CHECK

25 October 2026 | Edition 1.0

Start here: learn at your own pace

1. Read a slide, try its action, then check the result. Tap means click. Gold circles mark important controls in the screenshots.
2. Use your own account. Your organisation supplies the correct website address and any staff access.
3. Screenshots show the current interface with practice details. Actual names, content and menus may differ.

Read the step → **Try it yourself** → **Check the result**

If your menu looks different, first check My access. Do not ask someone to lend you their account.

CHECK: You will be able to run a class and help students find their work and feedback.

What this guide covers

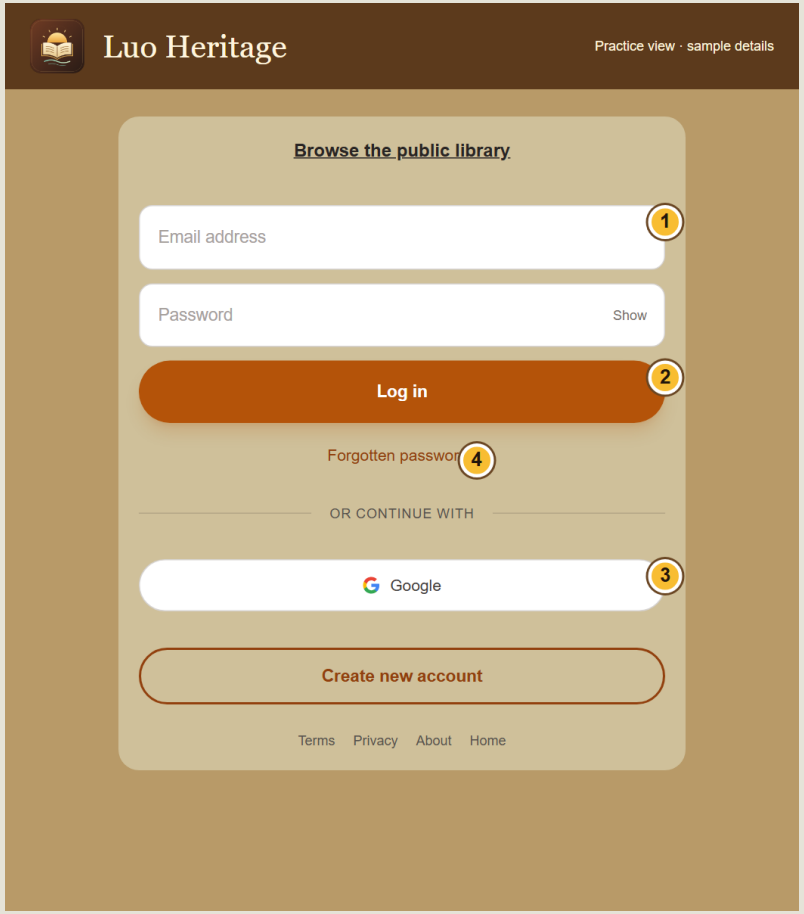

1. Get teaching access and create or open a class.
2. Invite learners, set assignments and review submissions.
3. Keep class results private and close a class responsibly.

CHECK: Use the slide numbers to return to a task. The PDF has page bookmarks; PowerPoint has a contents view.

Sign in to your own account

1. Open the Luo Heritage address supplied by your organisation. Choose Sign in or Log in.
2. Enter your email and password, then choose Log in. Check your spelling if it fails.
3. Community members may also use Google. Staff should use the account supplied by their administrator.

Never share your password. Use only an address you trust.

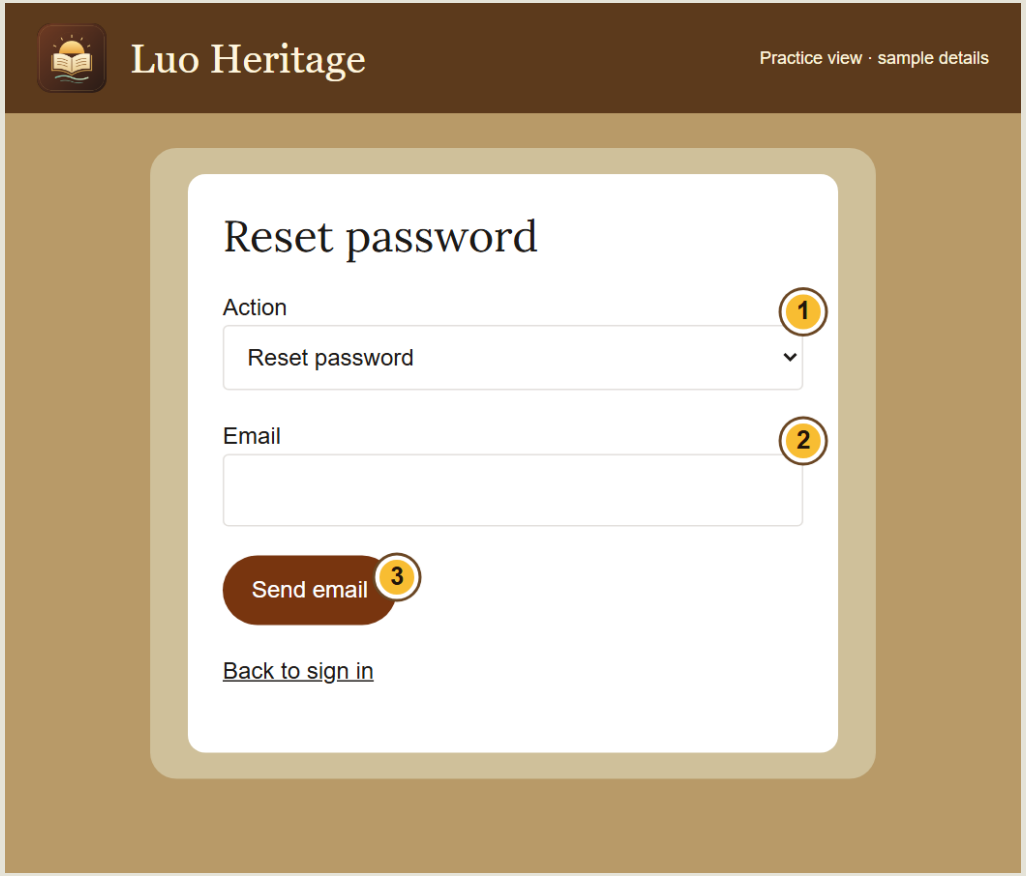

CHECK: Your account or dashboard opens.

Forgot your password?

1. On the sign-in screen, choose Forgotten password? Select Reset password.
2. Enter your account email. Choose Send email, then check your inbox and spam folder.
3. Open the newest reset link within 30 minutes. A link can be used only once.

If no email arrives, contact the person who manages your account. Do not keep requesting links.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: An account email arrives if the address is eligible and the email service is available.

Choose a new password

1. Open the password reset link from your own inbox.
2. Enter a new password of at least 12 characters. A short phrase with several words is easier to remember.
3. Choose Confirm. Return to sign in and use the new password on each device.

Do not forward the reset link. If it has expired, request a new one.

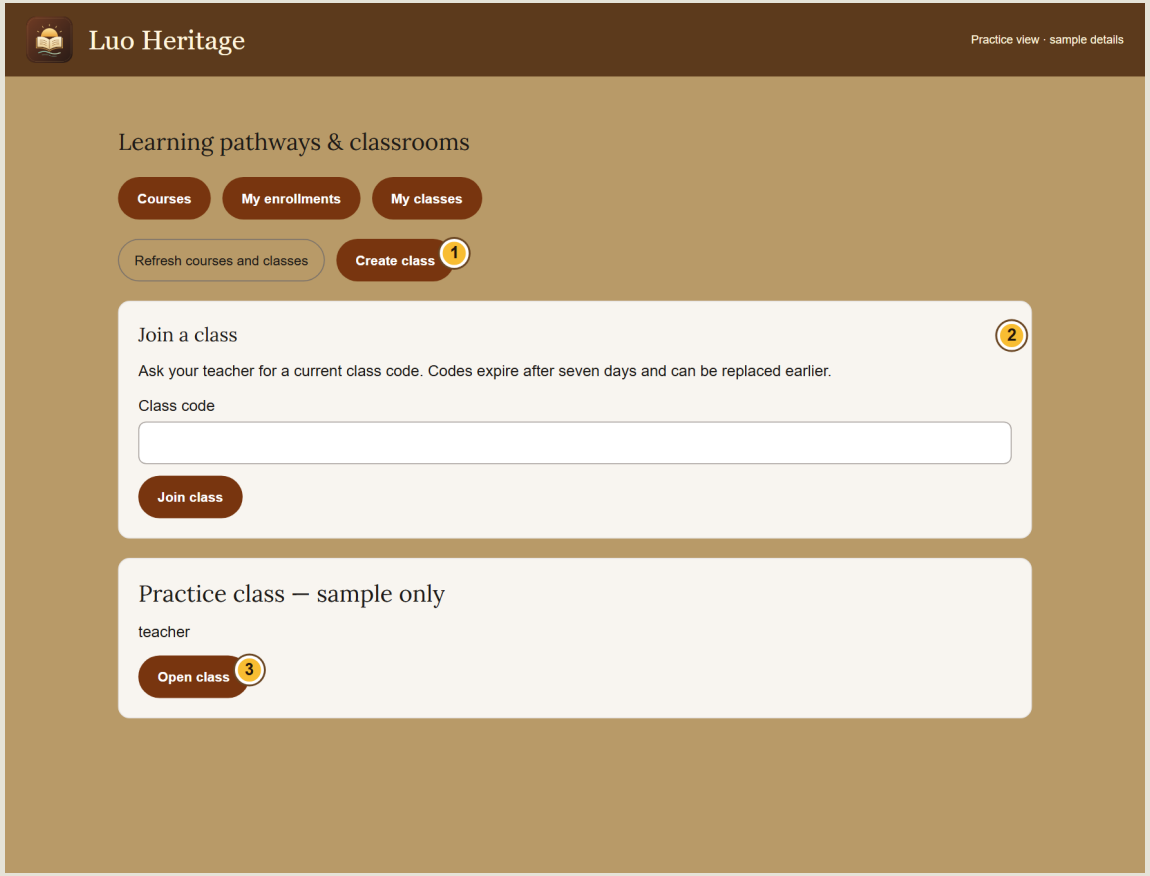

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The password changes and old sign-ins are ended.

Check that you have teaching access

1. Sign in with your own account. Open Teaching & my classes.
2. Look for Create class or an existing class where your role is teacher.
3. If these are missing, ask the language administrator to assign teaching access. Selecting teacher as an interest does not grant it.

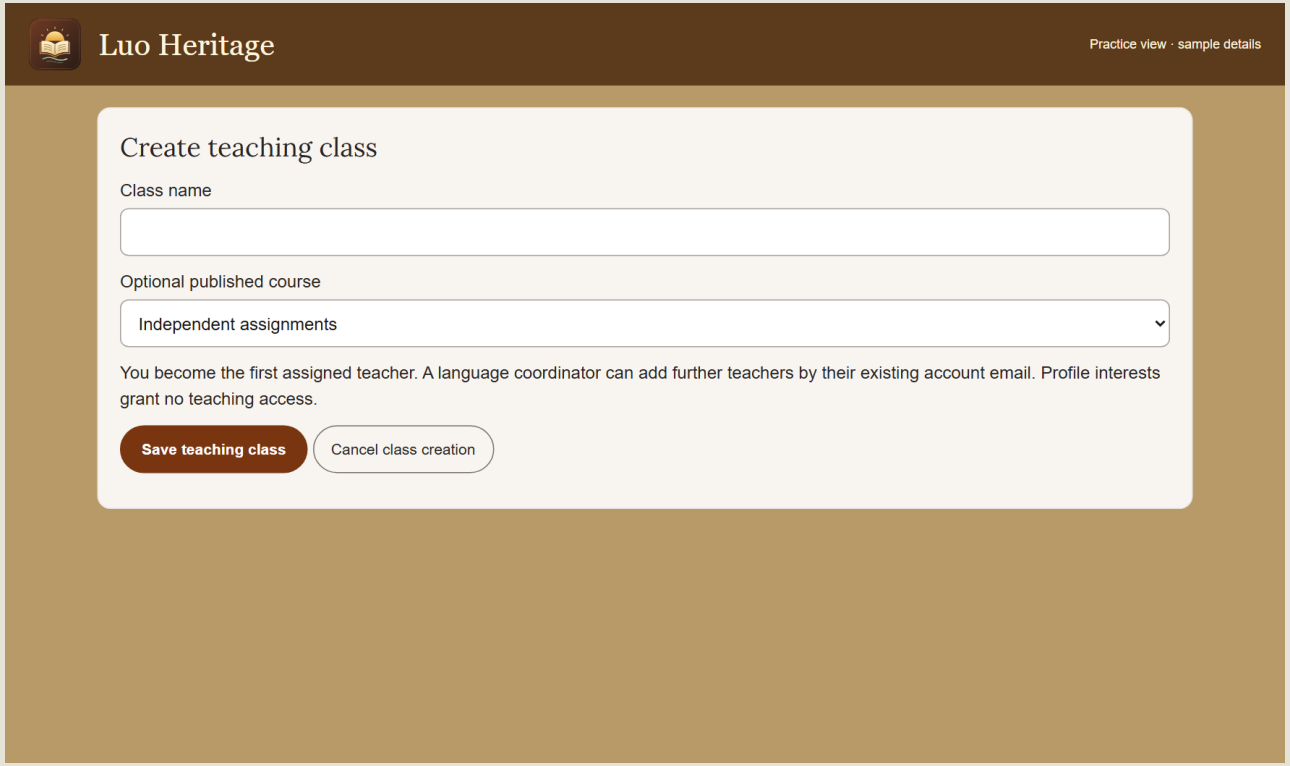

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You know whether you can teach a class or are viewing as a learner.

Create a teaching class

1. Open My classes and choose Create class.
2. Enter the class title and requested details. Select a published course if the class needs one.
3. Choose Save teaching class. Keep the new class join code private until you invite learners.

Teaching a class does not automatically let you publish cultural content or courses.

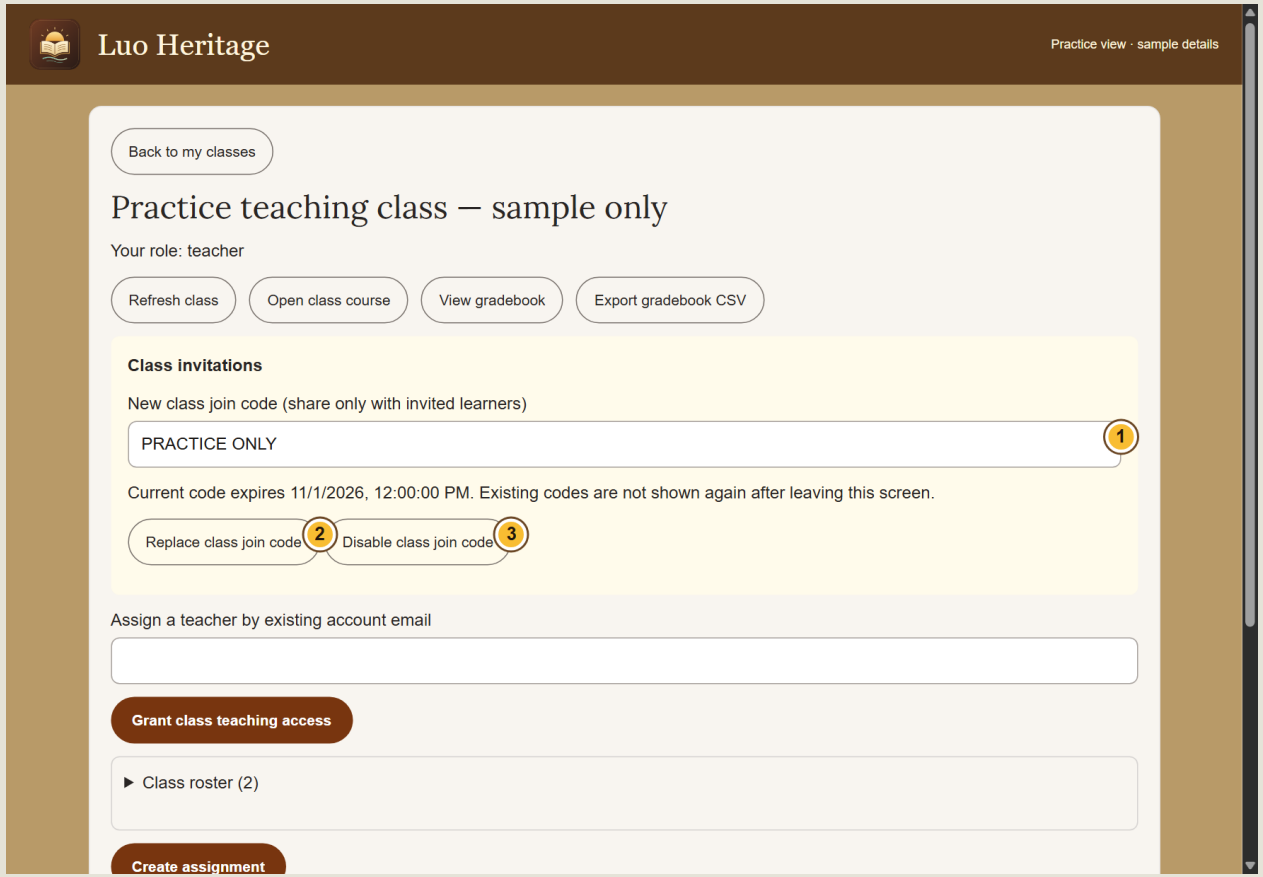

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The class opens and you can see its invitation controls.

Invite your learners safely

1. Open the class and find Class invitations. Share its current join code with the intended learners.
2. Ask learners to sign in and use Join a class. Check the member list afterwards.
3. If a code is shared too widely, choose Replace class join code or Disable class join code.

Codes expire after seven days. A replacement invalidates the previous code.

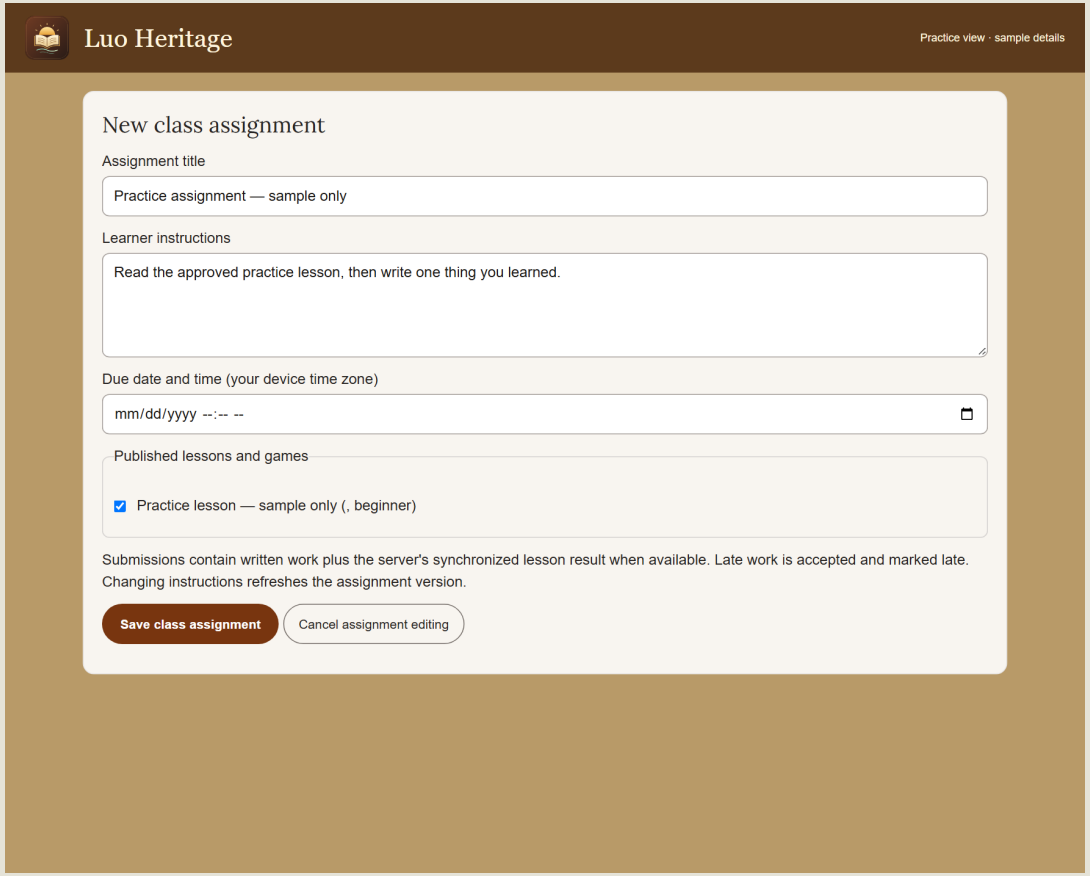

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The correct learners are listed in the class.

Set a useful assignment

1. Open the class and choose Create assignment.
2. Choose an available published lesson. Write a clear title, instructions and due date.
3. Choose Save class assignment. Open it again to check exactly what learners will see.

Use a lesson in the correct language. If a lesson is withdrawn, choose an approved replacement.

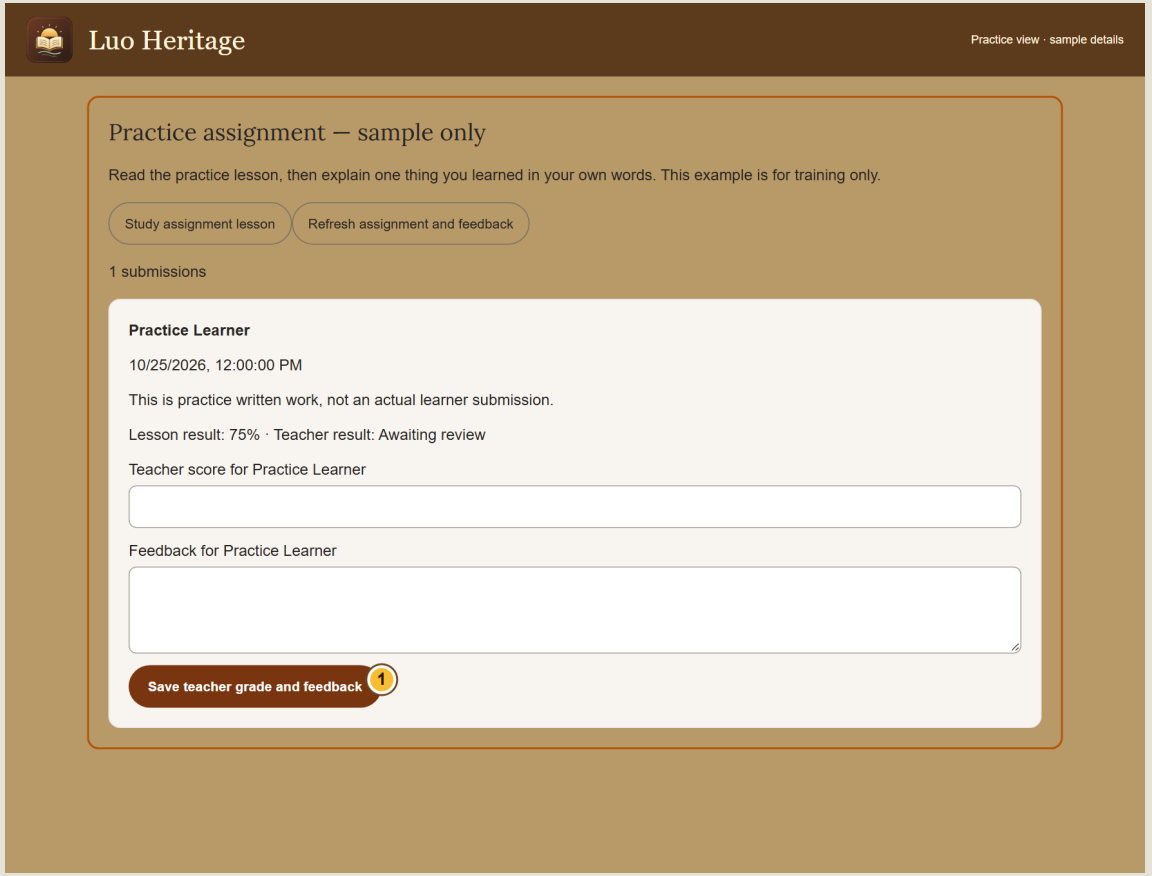

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The assignment is listed for members of this class.

Review a learner’s submission

1. Open the class assignment and choose the learner’s submission.
2. Read their work, enter the score and write feedback that explains one clear next step.
3. Choose Save teacher grade and feedback. Ask for another submission when correction is needed.

Check the learner’s name before saving. Do not discuss individual results in public chats.

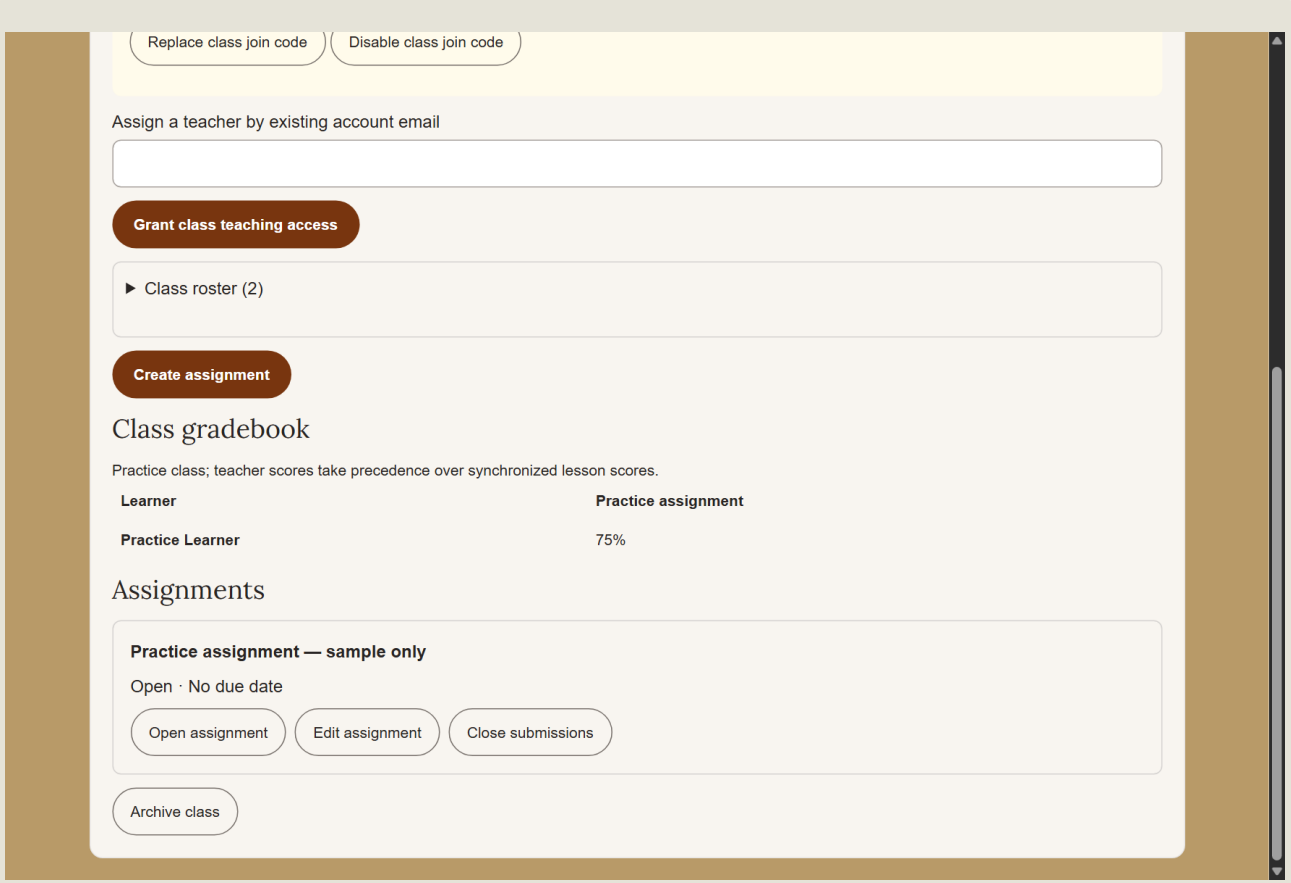

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The learner can refresh the assignment to see the saved grade and feedback.

See the class gradebook

1. Open the class and choose View gradebook.
2. Read the assignment columns and learner rows. A teacher’s grade takes priority over a synchronized lesson score.
3. Use Export gradebook CSV only if you are allowed to keep a spreadsheet copy. Store it privately.

A downloaded gradebook contains personal information. Do not share it as a public attachment.

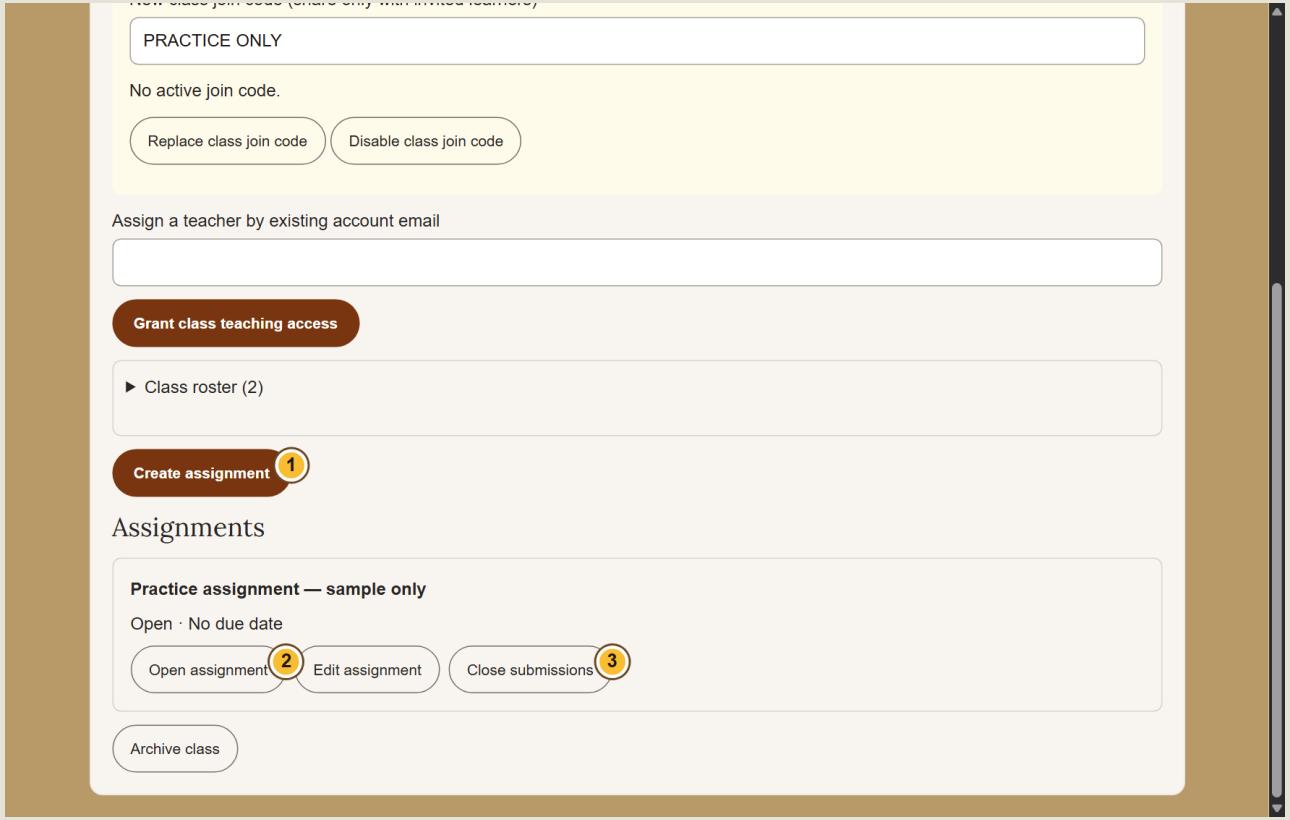

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You can identify submitted, ungraded and completed work.

Manage changes without losing work

1. Use Edit assignment before closing submissions. Read any warning when changing instructions.
2. Choose Close submissions when no more work should be accepted.
3. Remove a class member only after checking the consequences: that action can remove their class submissions.

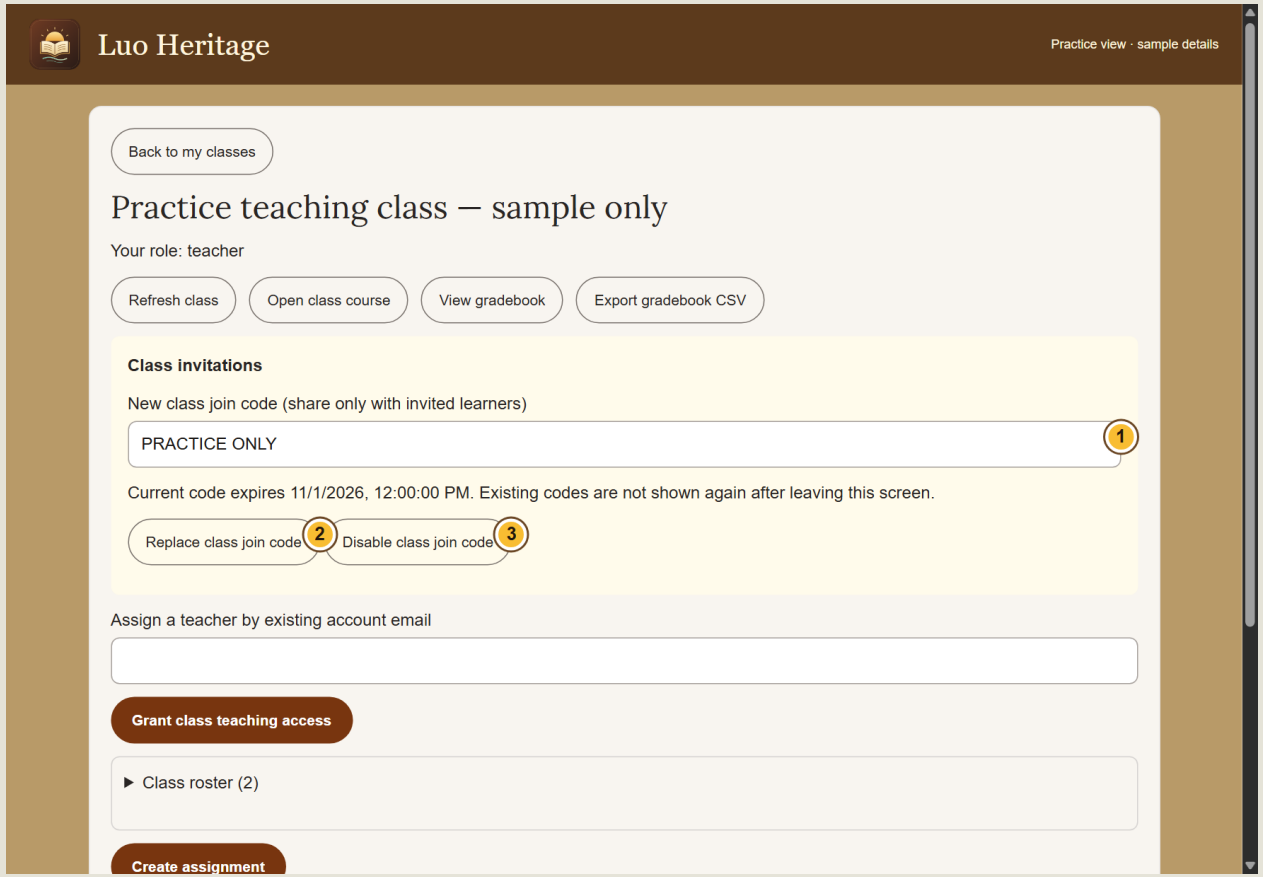

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Class membership and assignment availability match your intention.

Share teaching responsibility

1. Open the class and find Assign a teacher by existing account email.
2. Check the colleague’s exact account email and grant teaching access only if you have permission.
3. Confirm their role in the member list. Keep at least one teacher in each active class.

A class teacher is different from a system administrator.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The intended colleague has teaching access to this class.

Join a learning course

1. Open Learning pathways & courses. Choose a published course and read its description.
2. Open the course and enroll using the button shown. Start with the available lesson.
3. Use My enrollments to return later. If lessons are locked, complete the earlier lesson and required score first.

If no courses are available, ask your teacher which published course to use.

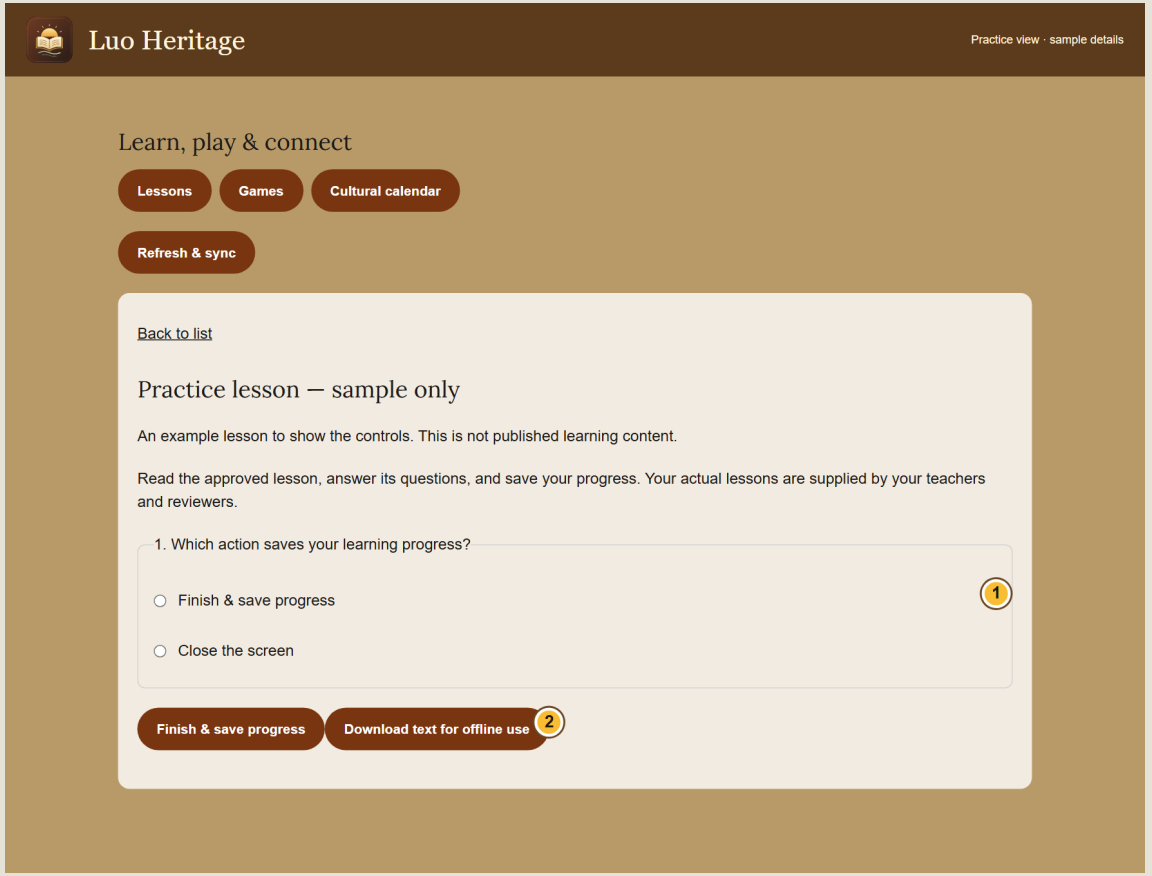

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The course appears among your enrollments and shows your lesson progress.

Open a lesson and keep your progress

1. Choose Lessons, games & calendar. Open a published lesson.
2. Read the lesson and answer its questions. Choose Finish & save progress.
3. Read the result and feedback. Sign in with the same account on another device to keep your learning together.

A score helps you learn; it does not replace a teacher’s review.

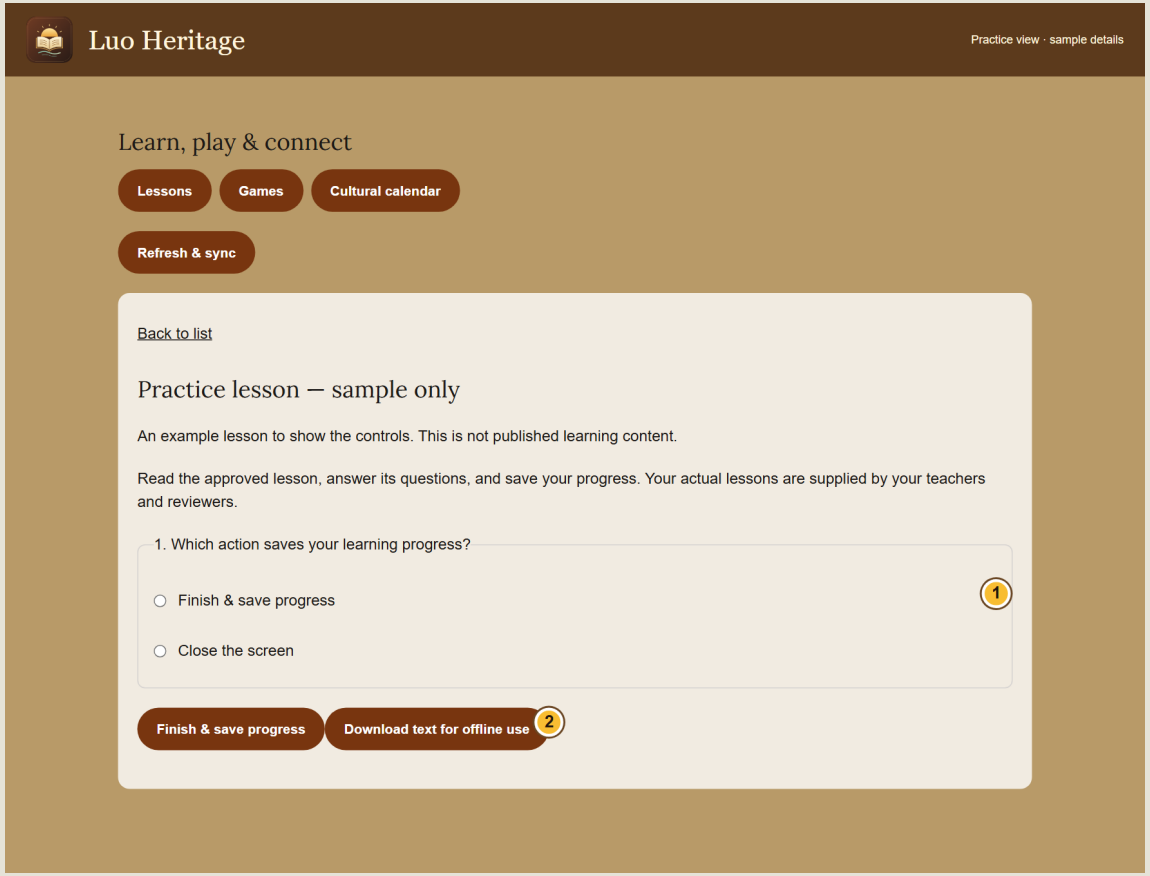

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You see a saved result or a message saying the attempt is waiting to go online.

Prepare to study without internet

1. While connected, open a lesson that allows downloads. Choose Download text for offline use.
2. Keep using the same browser or app profile. Downloaded text can be read without internet for up to seven days.
3. Reconnect and choose Refresh & sync. Keep the app open until waiting attempts have been saved online.

These downloads contain text, not the audio or video files. Some lessons cannot be downloaded.

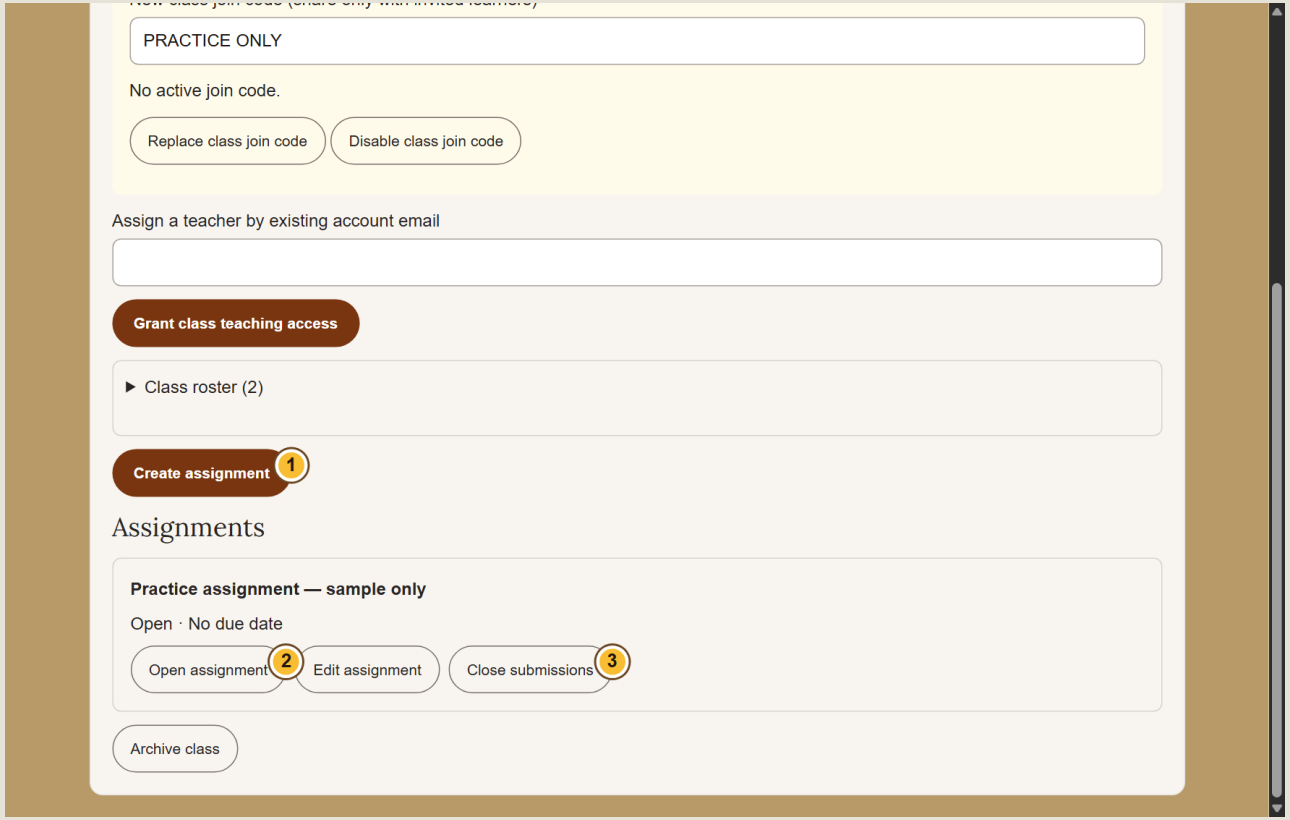

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Permitted lesson text is available offline and saved attempts can synchronize later.

Finish a term or close a class

1. Save any permitted reports before closing the class.
2. Choose Archive class only when teaching, invitations and submissions should end. Read the confirmation.
3. Explain to learners that archived classes remain readable to existing members, while new activity is closed.

Do not leave or remove the last teacher from an active class.

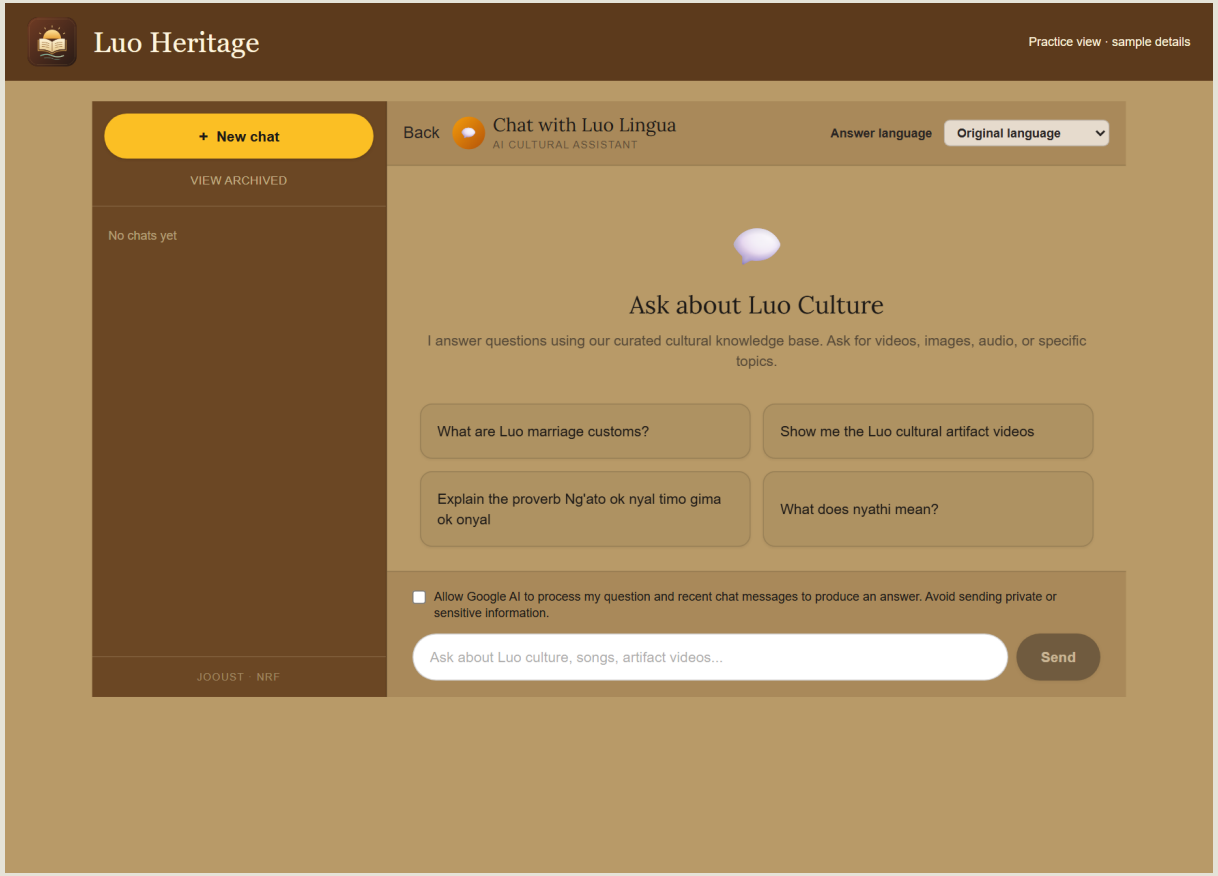

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The class is archived rather than accidentally deleted.

Ask the AI chatbot a clear question

1. Open Chat or Chatbot. Choose your answer language and read the processing permission notice.
2. If you agree, allow AI processing. Ask one clear question and wait for the response.
3. Open any sources provided. Ask a follow-up question if you need a simpler explanation.

AI can make mistakes. Do not enter private interviews, passwords or learners' personal information.

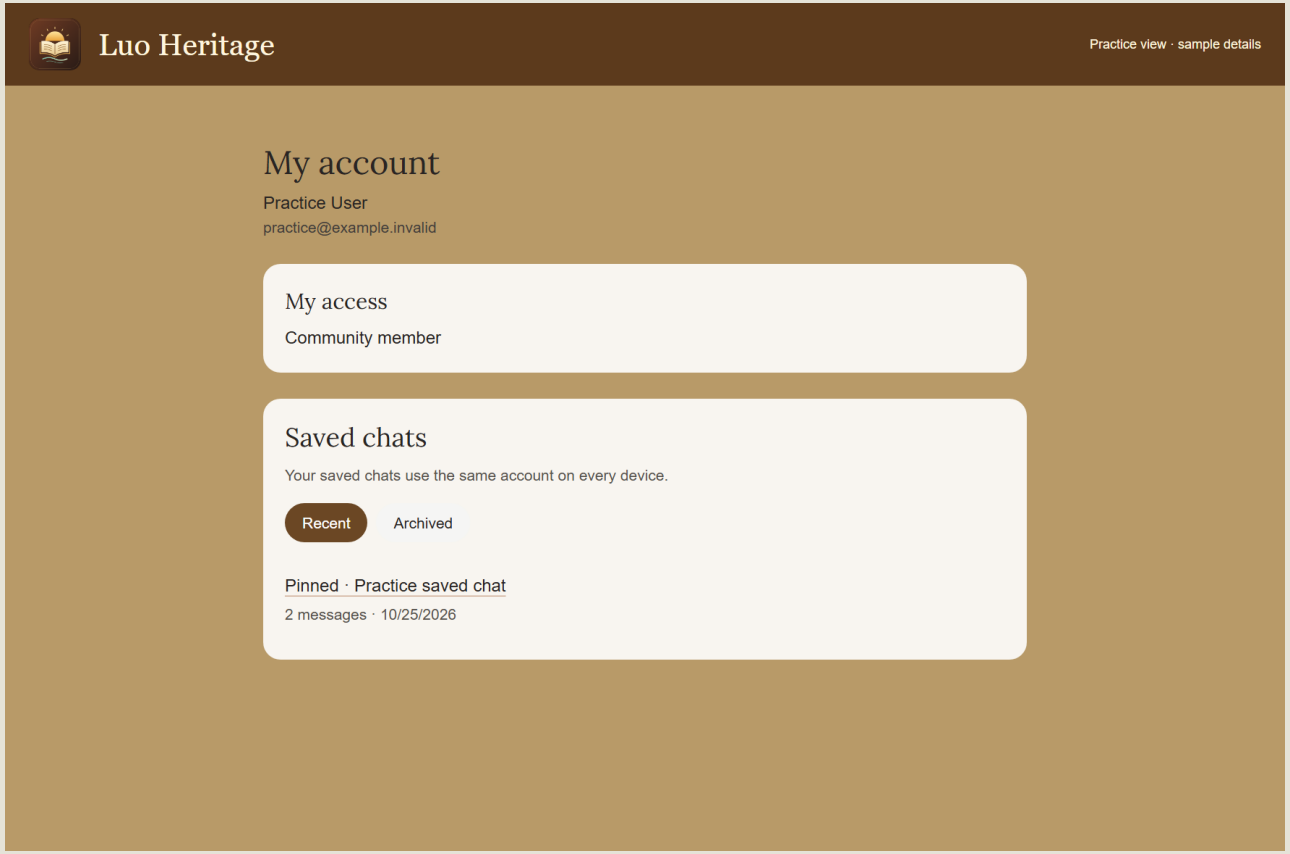

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You can read an answer and inspect any linked sources.

Protect your account and other people

1. Use your own account. Sign out on a shared computer or phone.
2. Do not copy private interviews, class results or account lists into public chats or messages.
3. If a screen shows information you should not see, stop and tell the account administrator.

Send support the screen name and error message, never your password or a reset link.

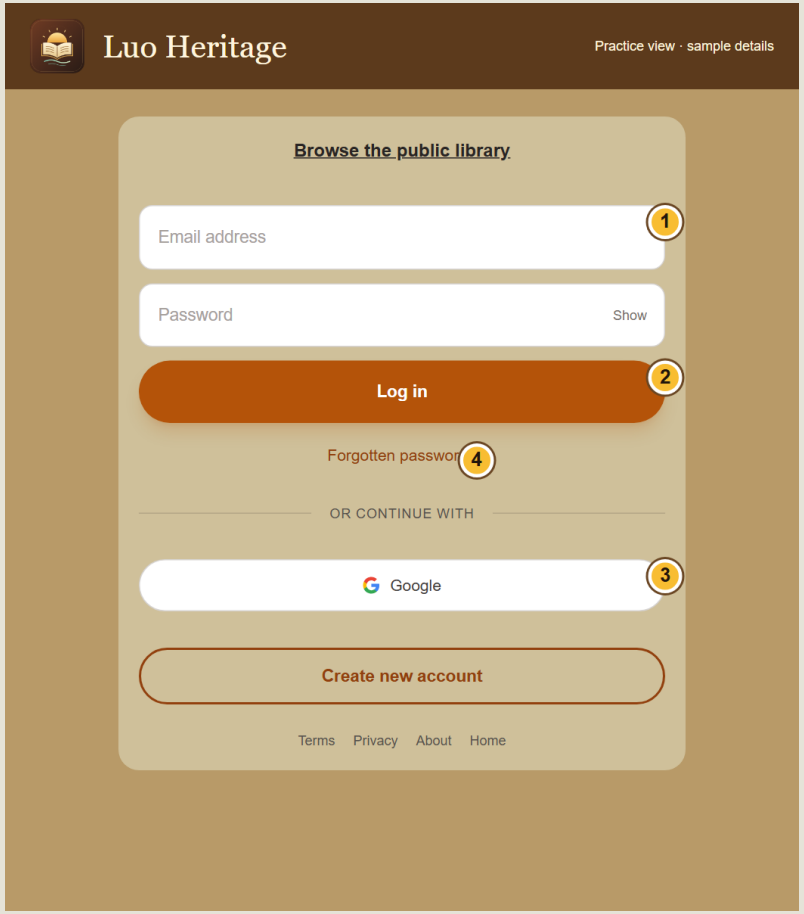

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Your work remains linked to the right person and private information stays protected.

When something does not work

1. Check your internet connection. Read the message on screen before trying again.
2. If your sign-in has expired, sign in again. If a button is missing, ask which role and language you have.
3. If it still fails, note the time, screen, button and exact message. Send these to your account administrator.

Before repeating an upload or submission, check whether the first attempt was already saved.

CHECK: You can explain the problem clearly without exposing private information.

Try it yourself: your readiness check

1. Open a practice class and explain how a student joins it.
2. Identify Create assignment, the feedback area and View gradebook.
3. Explain the difference between closing submissions, archiving a class and removing a learner.

Try → **Check** → **Ask if unsure**

Use only approved practice material. Do not publish, delete accounts or change live settings just to practise.

CHECK: You are ready for routine work when you can complete these steps without help.
