

LUO HERITAGE / SELF-STUDY SLIDES

LANGUAGE • CULTURE • LIVING MEMORY

Publishers

Make the final release decision responsibly

You will be able to check a reviewed item and distinguish public release from internal approval.

READ • TRY • CHECK

25 October 2026 | Edition 1.0

Start here: learn at your own pace

1. Read a slide, try its action, then check the result. Tap means click. Gold circles mark important controls in the screenshots.
2. Use your own account. Your organisation supplies the correct website address and any staff access.
3. Screenshots show the current interface with practice details. Actual names, content and menus may differ.

Read the step → **Try it yourself** → **Check the result**

If your menu looks different, first check My access. Do not ask someone to lend you their account.

CHECK: You will be able to check a reviewed item and distinguish public release from internal approval.

What this guide covers

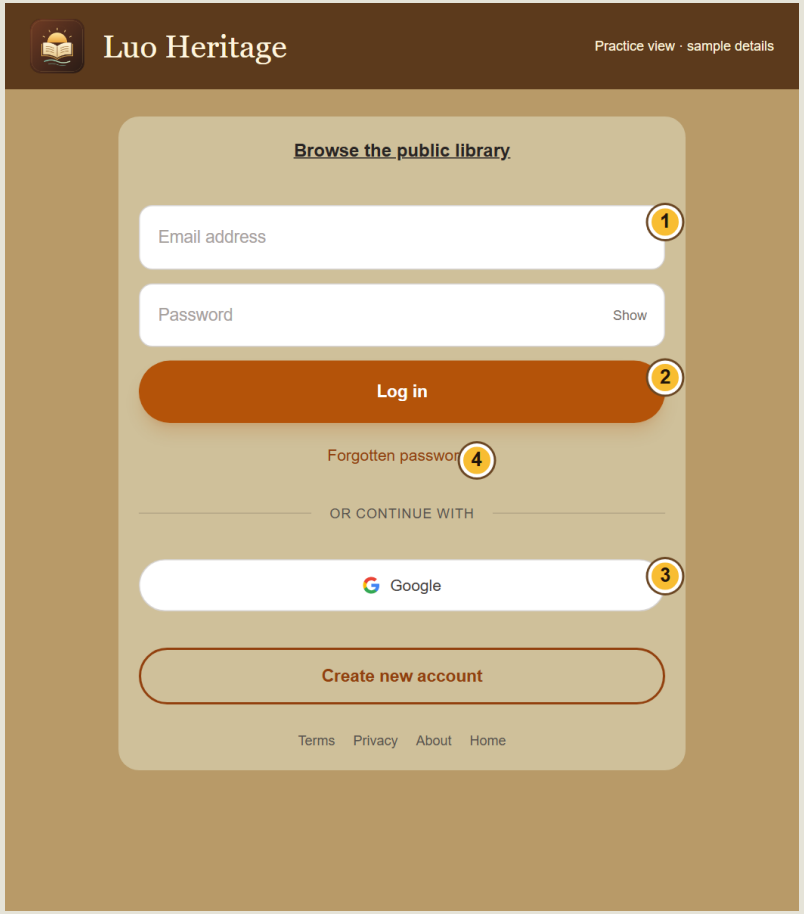

1. Find culturally reviewed items in Publishing Queue.
2. Check source permission, access and media before release.
3. Publish eligible material and verify what readers can see.

CHECK: Use the slide numbers to return to a task. The PDF has page bookmarks; PowerPoint has a contents view.

Sign in to your own account

1. Open the Luo Heritage address supplied by your organisation. Choose Sign in or Log in.
2. Enter your email and password, then choose Log in. Check your spelling if it fails.
3. Community members may also use Google. Staff should use the account supplied by their administrator.

Never share your password. Use only an address you trust.

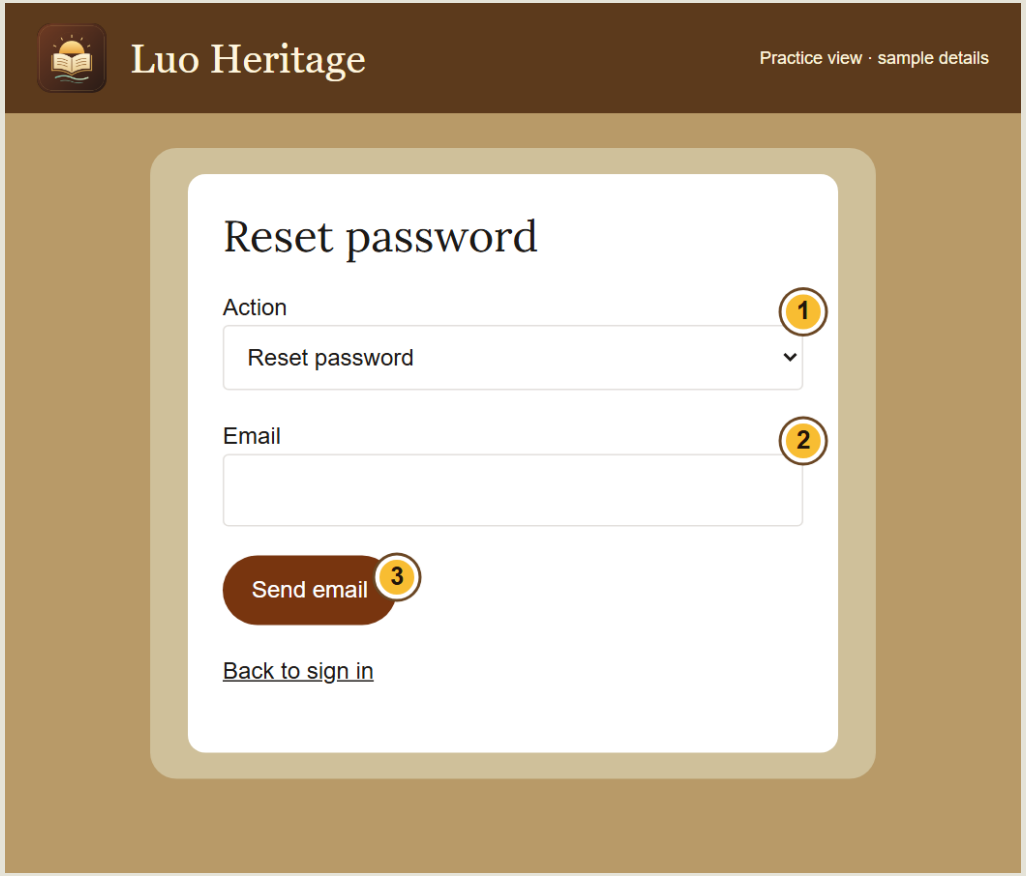

CHECK: Your account or dashboard opens.

Forgot your password?

1. On the sign-in screen, choose Forgotten password? Select Reset password.
2. Enter your account email. Choose Send email, then check your inbox and spam folder.
3. Open the newest reset link within 30 minutes. A link can be used only once.

If no email arrives, contact the person who manages your account. Do not keep requesting links.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: An account email arrives if the address is eligible and the email service is available.

Choose a new password

1. Open the password reset link from your own inbox.
2. Enter a new password of at least 12 characters. A short phrase with several words is easier to remember.
3. Choose Confirm. Return to sign in and use the new password on each device.

Do not forward the reset link. If it has expired, request a new one.

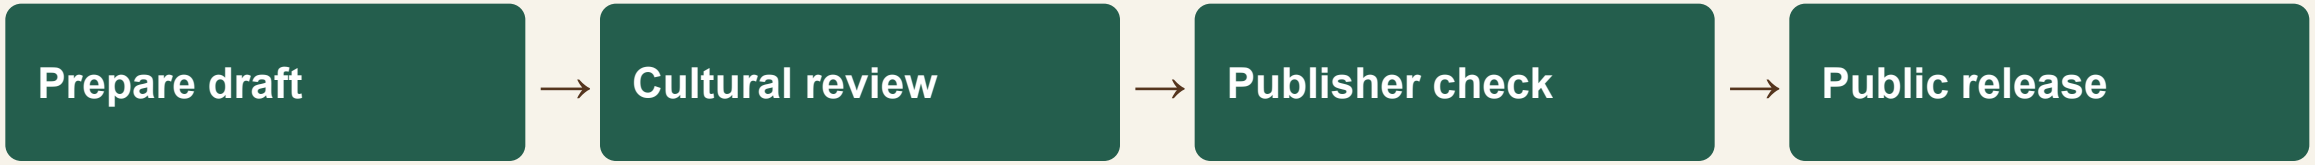

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The password changes and old sign-ins are ended.

How a contribution reaches readers

1. The uploader or contributor prepares a draft and submits it.
2. A cultural reviewer checks accuracy. An editor makes requested corrections and returns the item for review.
3. A publisher checks the final item and permission. Only an approved public release becomes visible to readers.

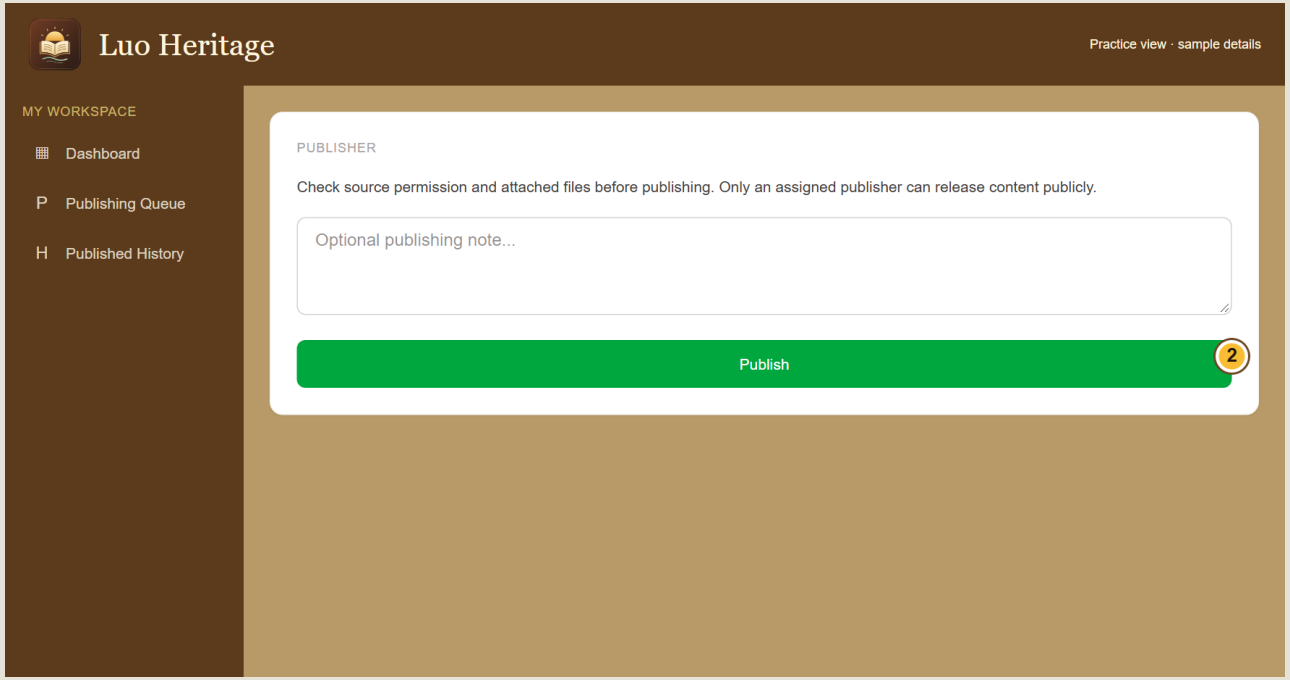

Different people should perform the independent checks. Do not approve your own work.

CHECK: An item may return for changes. Drafts and private approvals are not public publication.

Check carefully before choosing Publish

1. Open Publishing Queue and read the culturally reviewed item.
2. Check the text, attached files, source permission and public access settings. Add a note if needed.
3. Choose Publish only when the item is ready. Read the confirmation: an internal approval can remain private.

A Publish button is not permission to release sacred, restricted or research-only material.

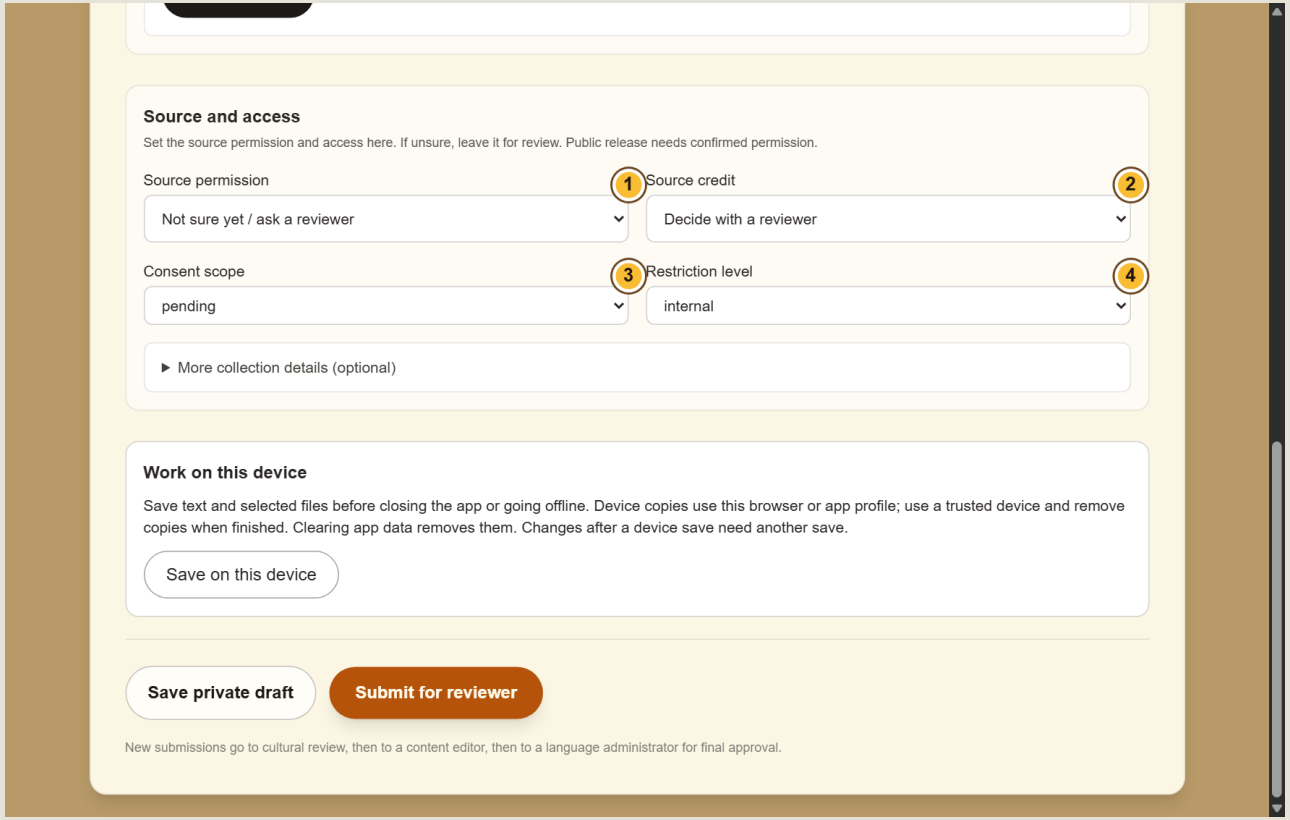

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Eligible public material becomes available to readers; internal material remains protected.

Check permission before sharing

1. Under Source and access, choose Source permission. If unsure, leave Not sure yet / ask a reviewer.
2. Choose how to credit the source. Use a person’s name only when they agree.
3. Keep restricted, sacred or research-only material private. Ask a reviewer before changing access.

Permission to collect material is not automatically permission to publish it.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The draft records who may use the material and how the source should be credited.

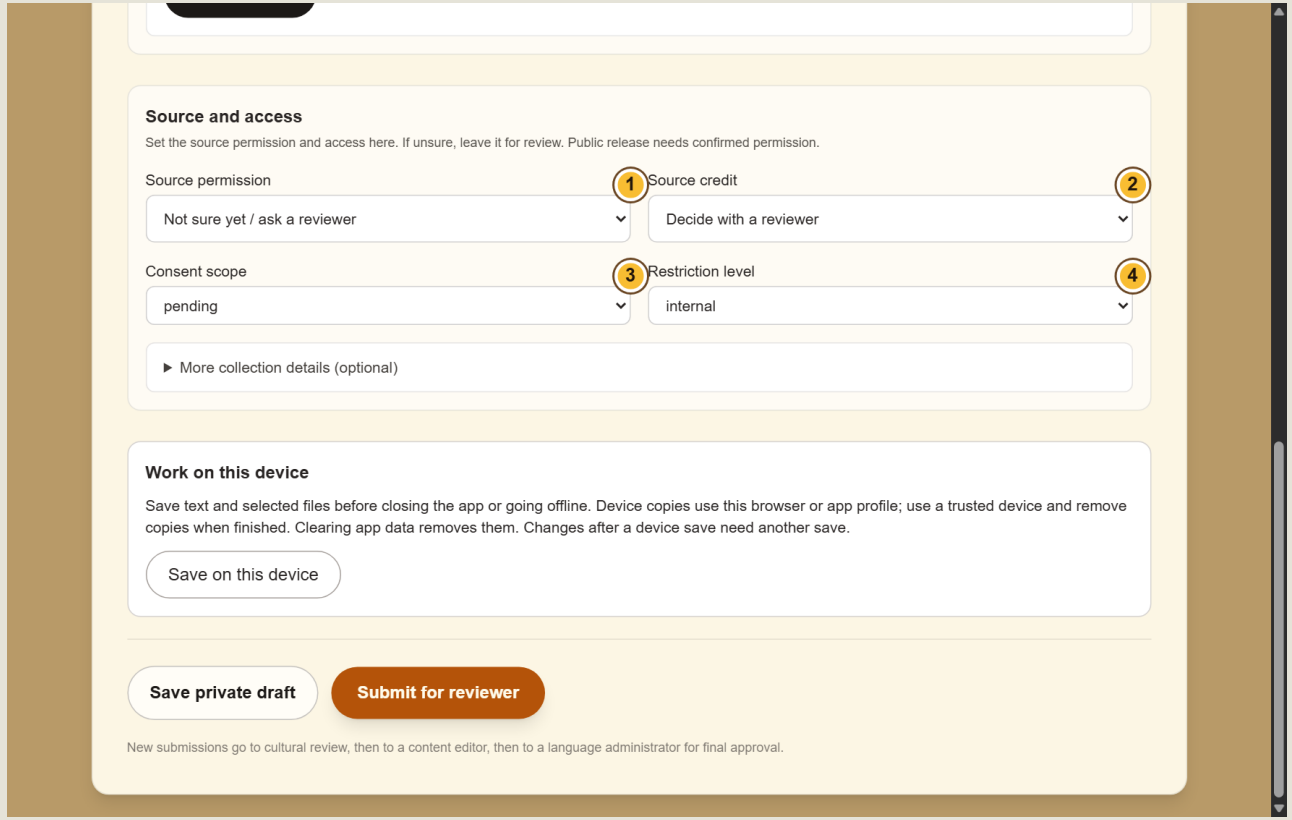

What the permission labels mean

1. Source permission: has the source agreed to the proposed use? Choose Not sure yet when you do not know.

2. Consent scope: what use was agreed? Public excerpt means an approved public part; research only and teaching have different limits.

3. Restriction level: who may see it? Internal and restricted are not public. Sacred material needs the collection owner's special care.

If the permission record is unclear, keep the item private and ask the responsible reviewer.

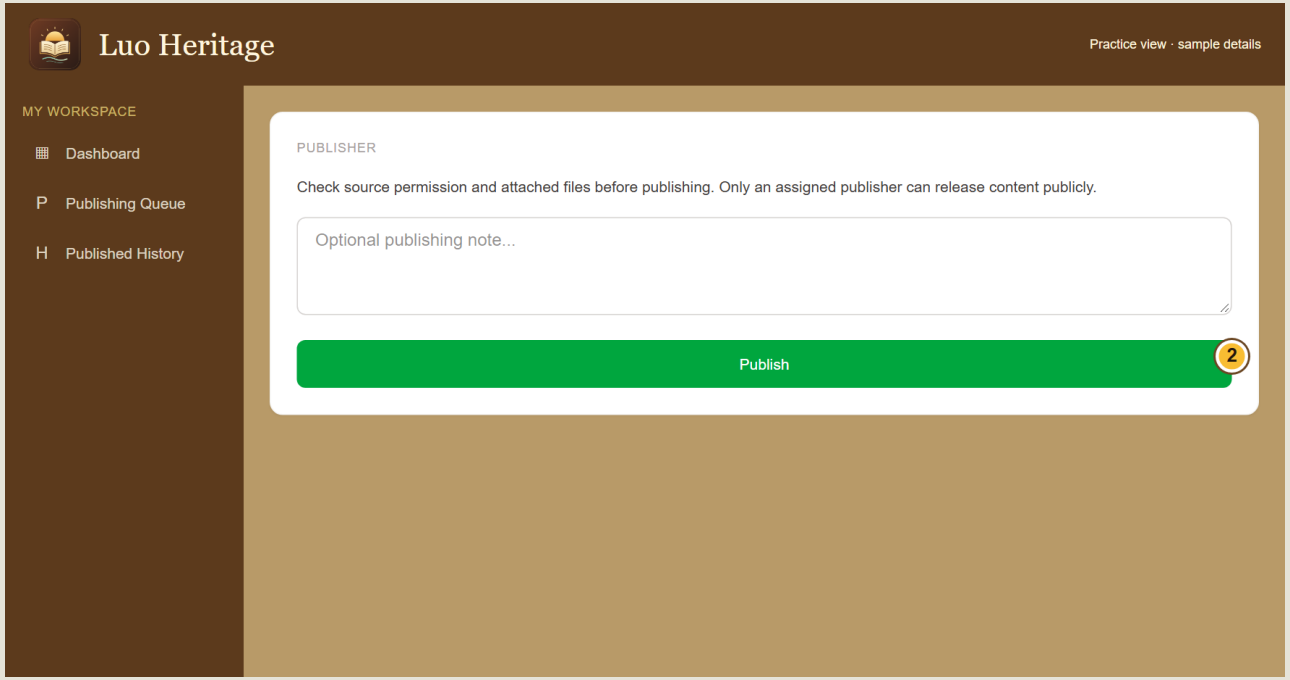

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You understand the labels before you change them.

Use a final pre-publication check

1. Confirm the title, language and current version are correct and the cultural review is complete.
2. Open the files and read descriptions, translations and source credit. Check that public sharing is actually permitted.
3. If anything is unclear, stop and contact the reviewer or language administrator before publishing.

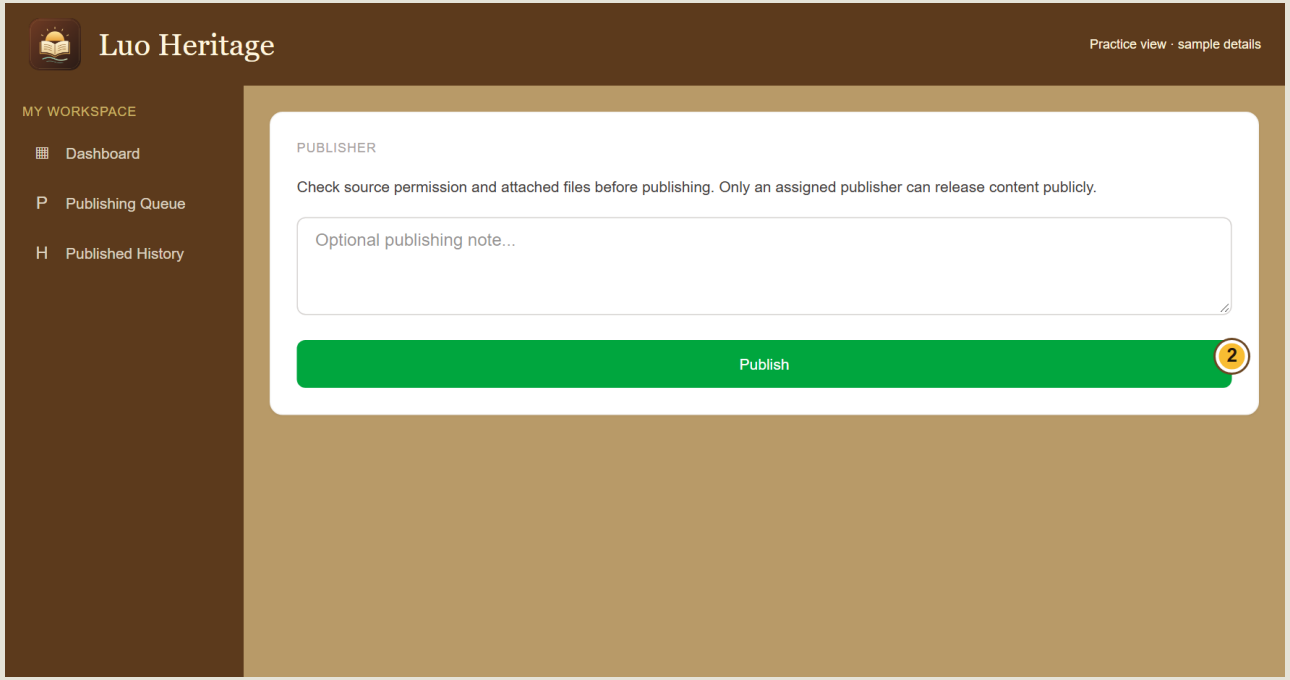

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The release decision is based on the complete item and its permission evidence.

Understand the confirmation message

1. After choosing Publish, read the full success message.
2. Public release means eligible readers can see the item. Internal curation means it remains private.
3. Do not change consent or access merely to make an internally approved item appear in the public library.

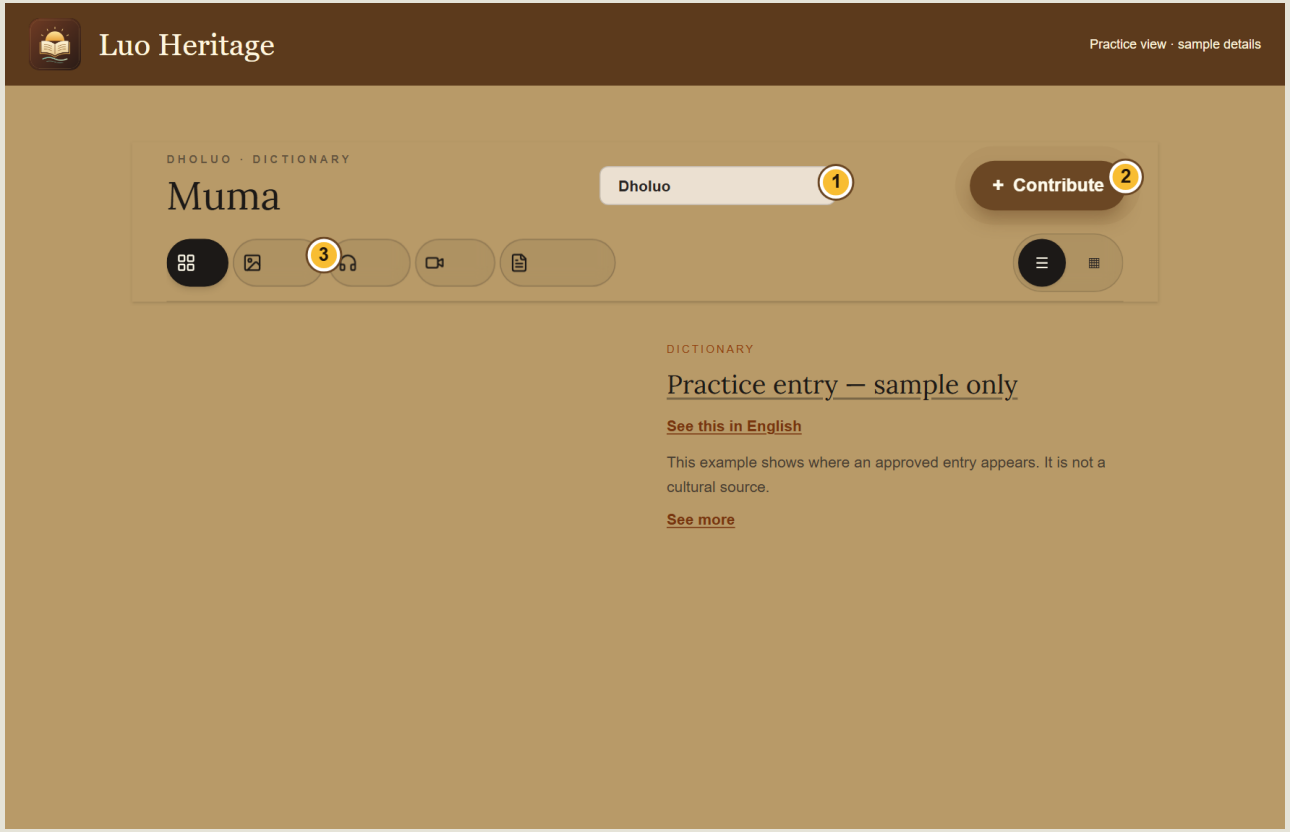

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You know whether the item was publicly released or privately curated.

Check the reader’s view

1. Open the public library, preferably in a separate signed-out browser window.
2. Choose the correct collection and content type. Find the released item and try its files.
3. If it is missing, confirm the release message, language, permission and selected filter before escalating.

Do not test private content by sharing a staff-only link with a member of the public.

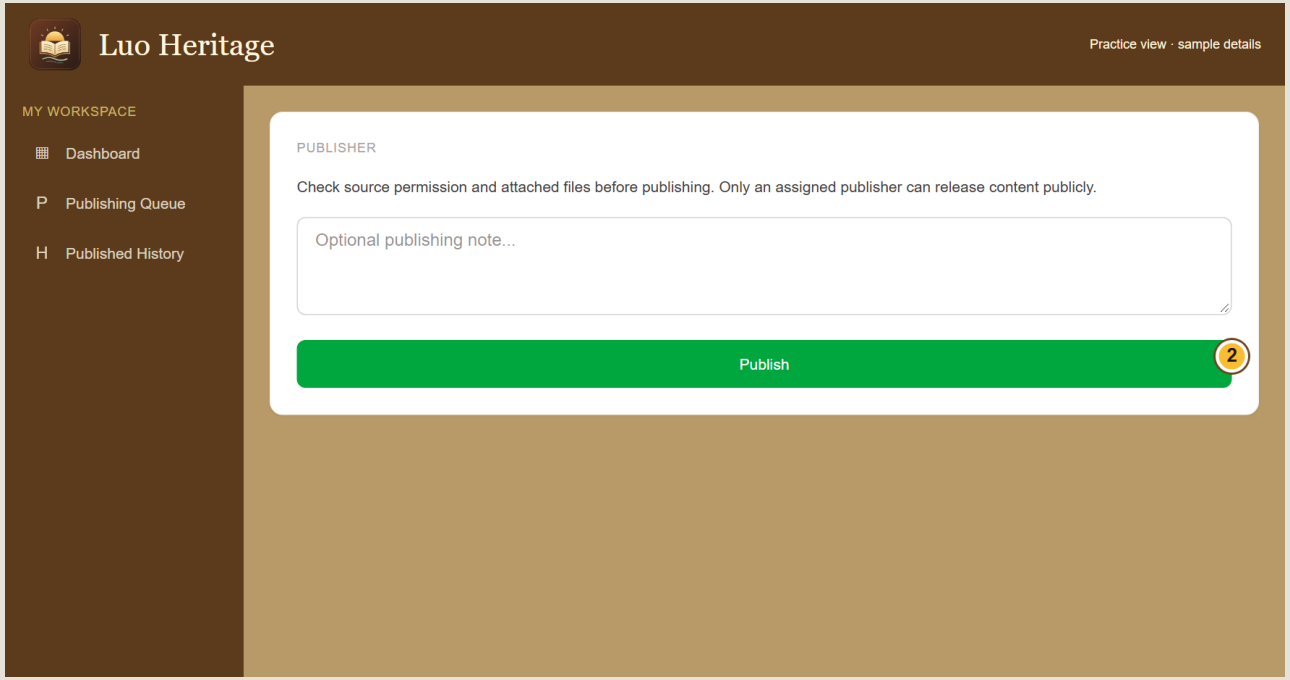

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The intended public item is readable and its files are usable.

Keep the publication record

1. Open Published History to find earlier releases.
2. Record any concern with the item’s title and reference, and notify the language administrator.
3. If an urgent rights or privacy issue is found, request the approved withdrawal process. Do not assume a saved edit removes a public item.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Publication decisions and later concerns can be traced.

Publish lessons and courses separately

1. In the learning content workspace, inspect validated resources and use publish only when permitted.
2. For a course, open its staff view and choose Publish course after independent review.
3. Confirm that both the course and its linked lessons are available to the intended learners.

You cannot independently approve a resource you authored yourself.

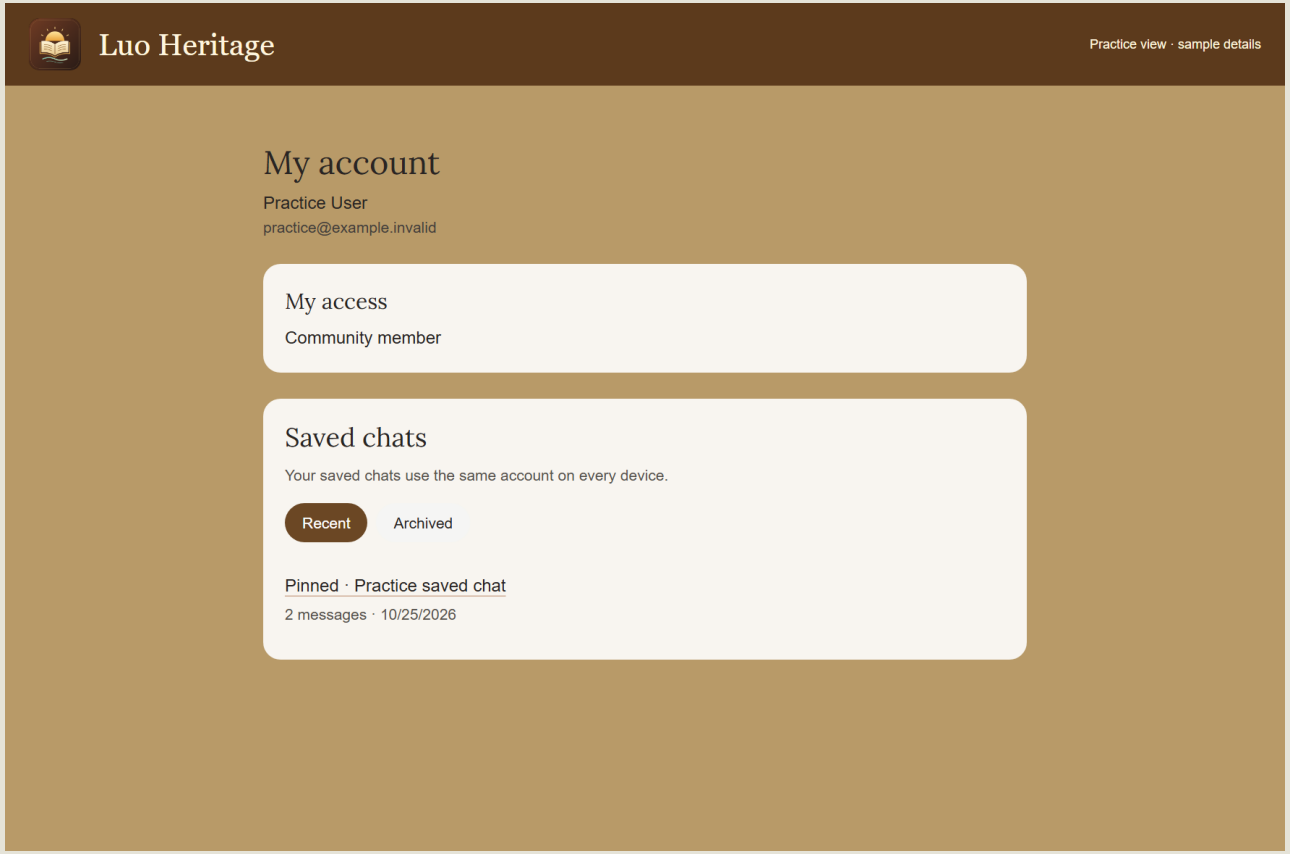

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Learners see a usable course with available lessons.

Protect your account and other people

1. Use your own account. Sign out on a shared computer or phone.
2. Do not copy private interviews, class results or account lists into public chats or messages.
3. If a screen shows information you should not see, stop and tell the account administrator.

Send support the screen name and error message, never your password or a reset link.

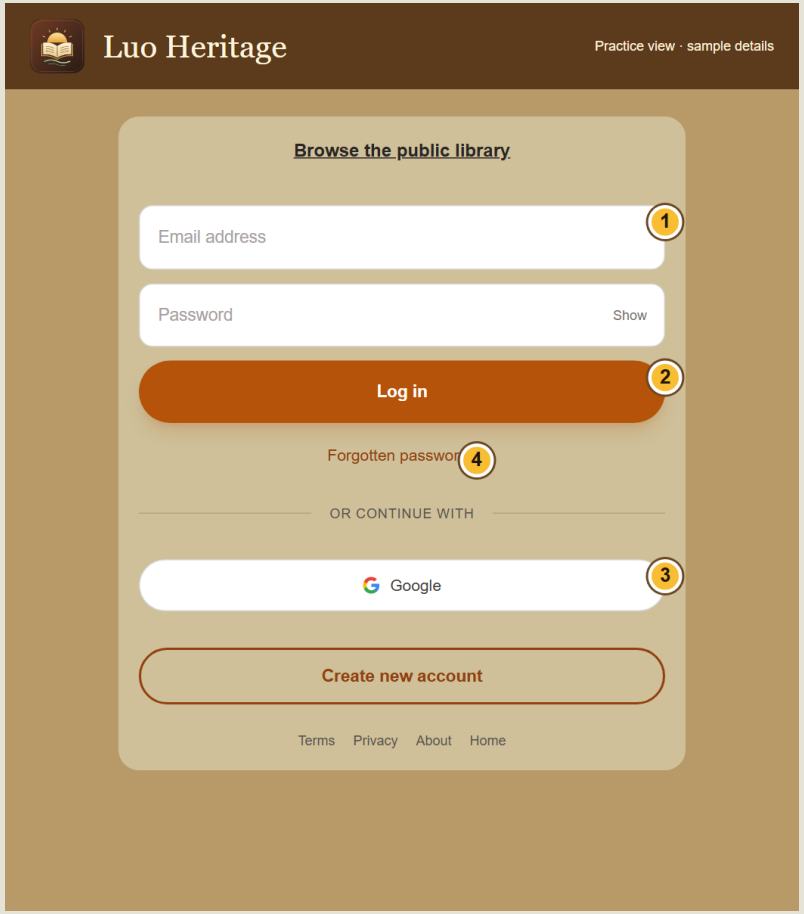

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Your work remains linked to the right person and private information stays protected.

When something does not work

1. Check your internet connection. Read the message on screen before trying again.
2. If your sign-in has expired, sign in again. If a button is missing, ask which role and language you have.
3. If it still fails, note the time, screen, button and exact message. Send these to your account administrator.

Before repeating an upload or submission, check whether the first attempt was already saved.

CHECK: You can explain the problem clearly without exposing private information.

Try it yourself: your readiness check

1. Explain the checks you make before Publish.
2. Distinguish a public release from an internal approval.
3. Find the public collection and explain how you would report an incorrect release.

Try → **Check** → **Ask if unsure**

Use only approved practice material. Do not publish, delete accounts or change live settings just to practise.

CHECK: You are ready for routine work when you can complete these steps without help.
