

LUO HERITAGE / SELF-STUDY SLIDES

LANGUAGE • CULTURE • LIVING MEMORY

Super Admins

Oversee assigned languages and support staff

You will be able to coordinate access and monitor work without confusing oversight with editorial permission.

READ • TRY • CHECK

25 October 2026 | Edition 1.0

Start here: learn at your own pace

1. Read a slide, try its action, then check the result. Tap means click. Gold circles mark important controls in the screenshots.
2. Use your own account. Your organisation supplies the correct website address and any staff access.
3. Screenshots show the current interface with practice details. Actual names, content and menus may differ.

Read the step → **Try it yourself** → **Check the result**

If your menu looks different, first check My access. Do not ask someone to lend you their account.

CHECK: You will be able to coordinate access and monitor work without confusing oversight with editorial permission.

What this guide covers

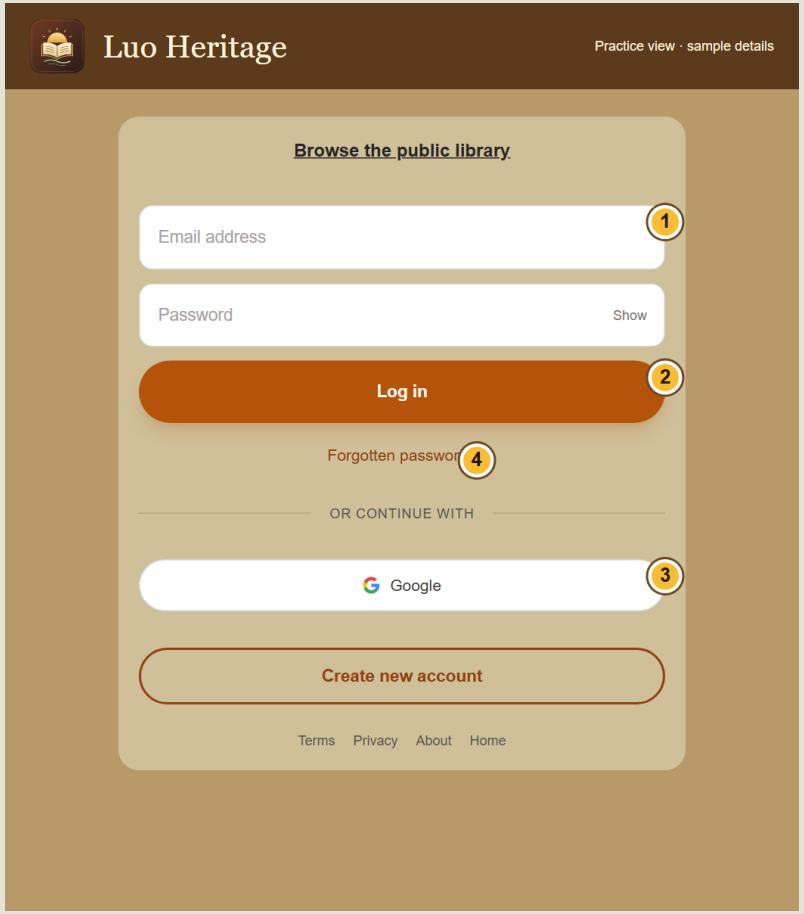

1. Understand what your wider menu allows and what remains restricted.
2. Manage staff for your assigned languages and help users.
3. Monitor content, activity and system settings responsibly.

CHECK: Use the slide numbers to return to a task. The PDF has page bookmarks; PowerPoint has a contents view.

Sign in to your own account

1. Open the Luo Heritage address supplied by your organisation. Choose Sign in or Log in.
2. Enter your email and password, then choose Log in. Check your spelling if it fails.
3. Community members may also use Google. Staff should use the account supplied by their administrator.

Never share your password. Use only an address you trust.

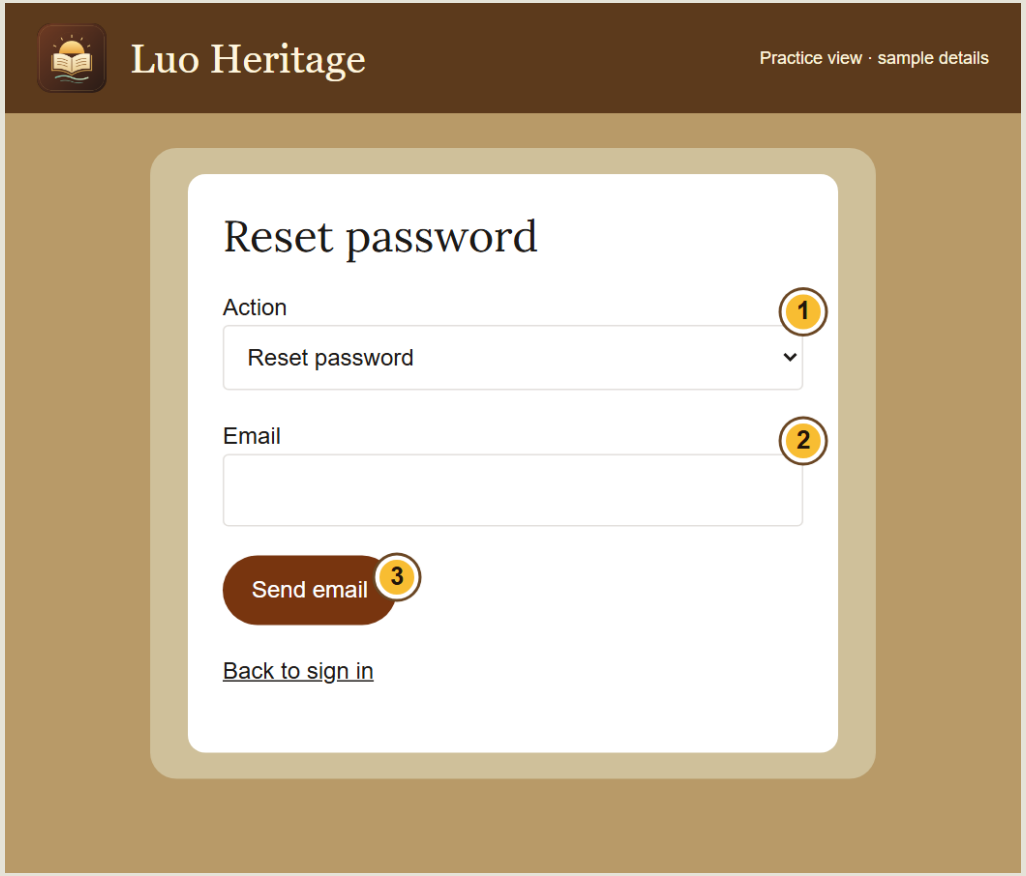

CHECK: Your account or dashboard opens.

Forgot your password?

1. On the sign-in screen, choose Forgotten password? Select Reset password.
2. Enter your account email. Choose Send email, then check your inbox and spam folder.
3. Open the newest reset link within 30 minutes. A link can be used only once.

If no email arrives, contact the person who manages your account. Do not keep requesting links.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: An account email arrives if the address is eligible and the email service is available.

Choose a new password

1. Open the password reset link from your own inbox.
2. Enter a new password of at least 12 characters. A short phrase with several words is easier to remember.
3. Choose Confirm. Return to sign in and use the new password on each device.

Do not forward the reset link. If it has expired, request a new one.

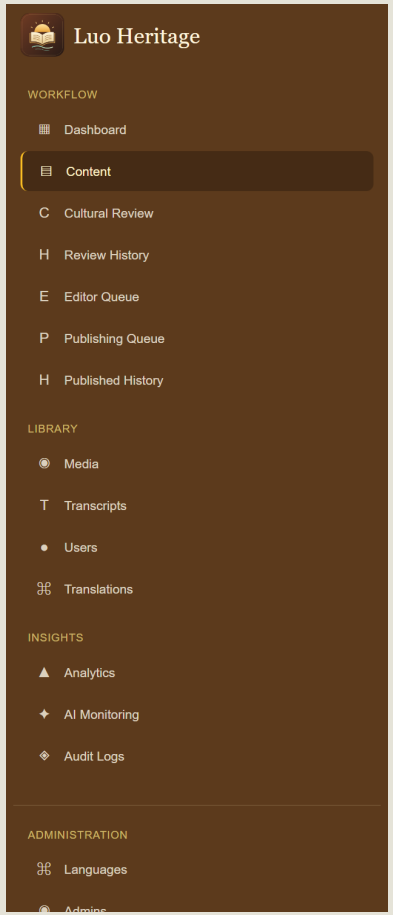

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The password changes and old sign-ins are ended.

Understand your wider menu

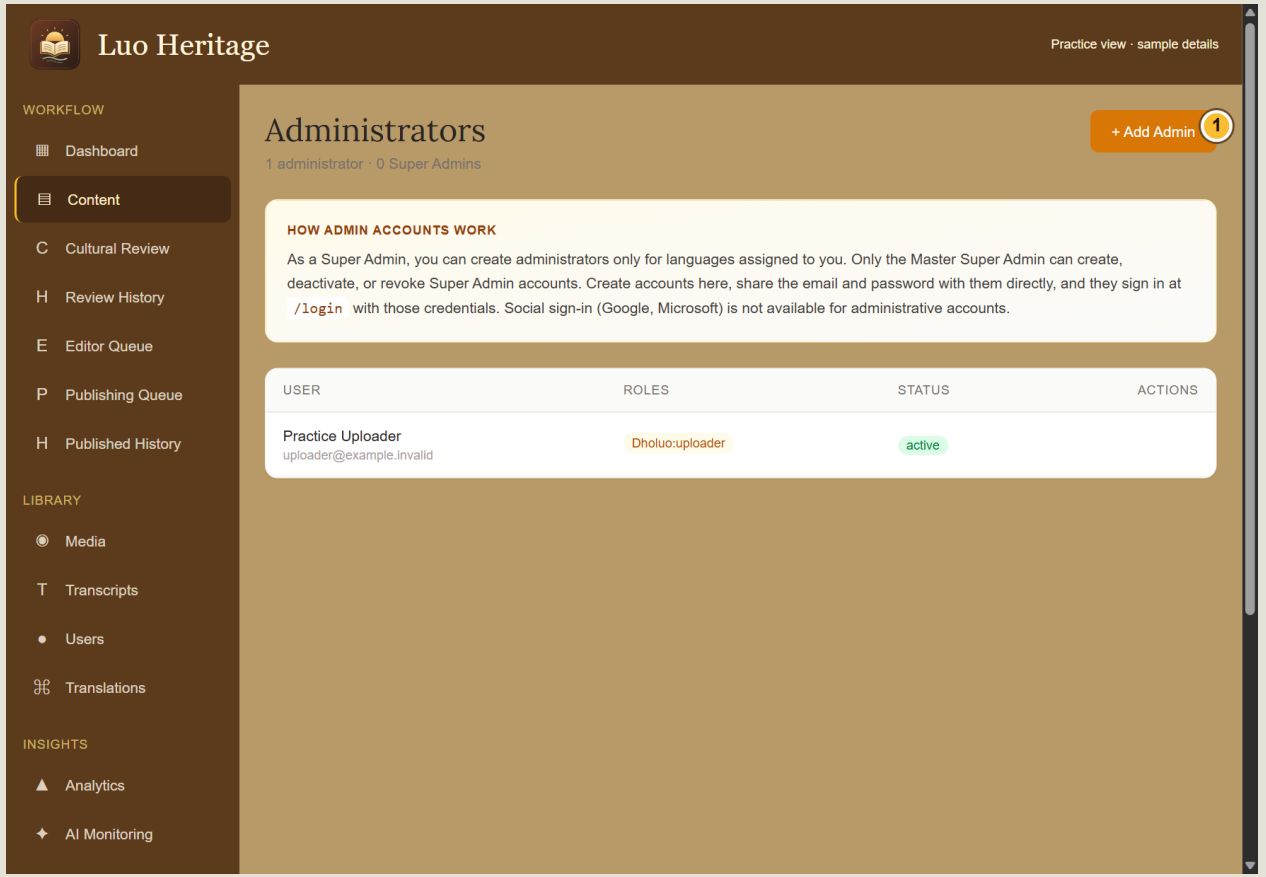

1. Use Workflow and Library to inspect content, people and collections.
2. Use Insights to see Analytics, AI Monitoring and Audit Logs.
3. Administration contains Languages, Admins, Backup and System. Visibility does not mean every action is allowed.

CHECK: You can find the right area without assuming that every visible button is yours to use.

Know the limits of Super Admin access

1. You oversee the languages assigned to you and may create permitted staff within that scope.
2. Editing, cultural review, uploading and publishing still require their assigned language duties.
3. Only the Master Super Admin can create or remove Super Admin authority. Database backups are also reserved for that owner.

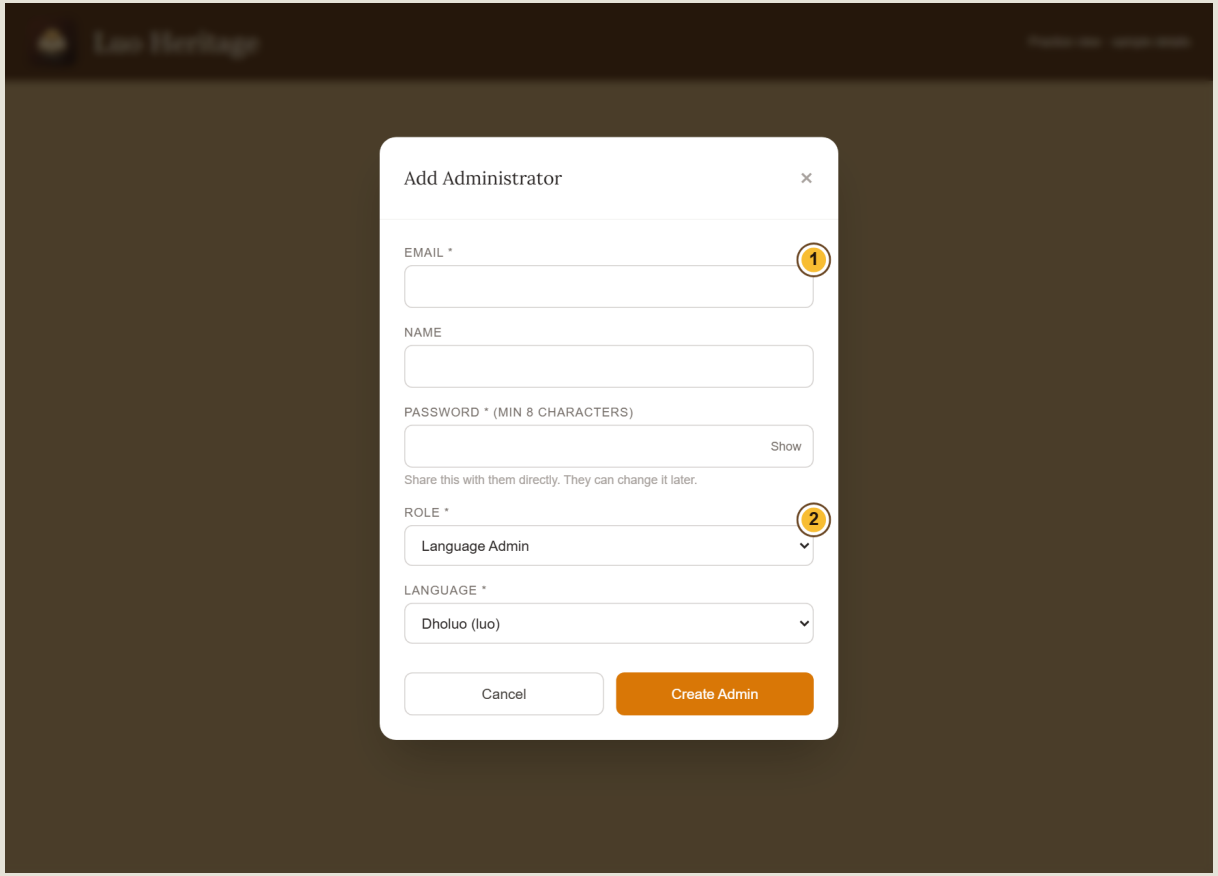

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You know when to act and when to refer the request to the Master Super Admin.

Create a staff account for the right person

1. Open Admins, then choose + Add Admin. Confirm the person's email and name.
2. Choose only the role and language the person needs. Set a strong temporary password.
3. Save the account. Share access details privately with that person and ask them to set their own password.

Only the Master Super Admin can create or remove Super Admin authority.

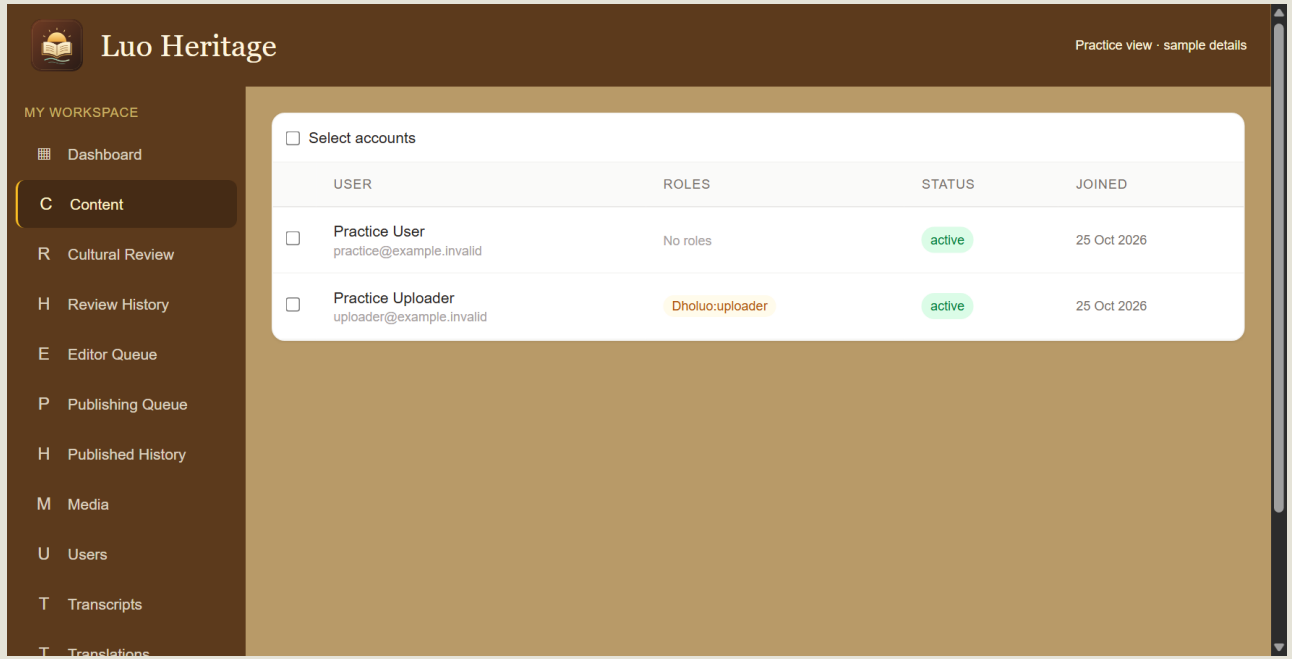

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The staff member appears in Administrators with the intended role and language.

Help users without changing the wrong account

1. Open Users. Find the person by their own name and email.
2. Open their details and check their language and current access before changing anything.
3. Use only the changes allowed by your role. Read every confirmation before suspending or activating accounts.

Do not select every account to solve a problem affecting one person.

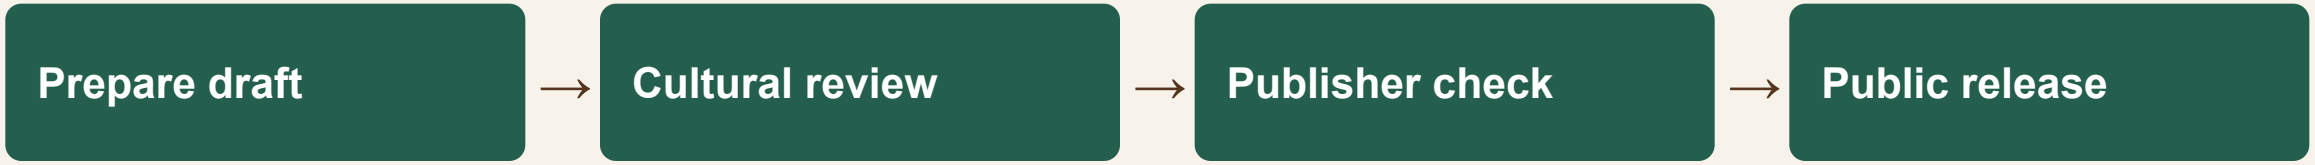

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The intended account has the correct status and access.

How a contribution reaches readers

1. The uploader or contributor prepares a draft and submits it.
2. A cultural reviewer checks accuracy. An editor makes requested corrections and returns the item for review.
3. A publisher checks the final item and permission. Only an approved public release becomes visible to readers.

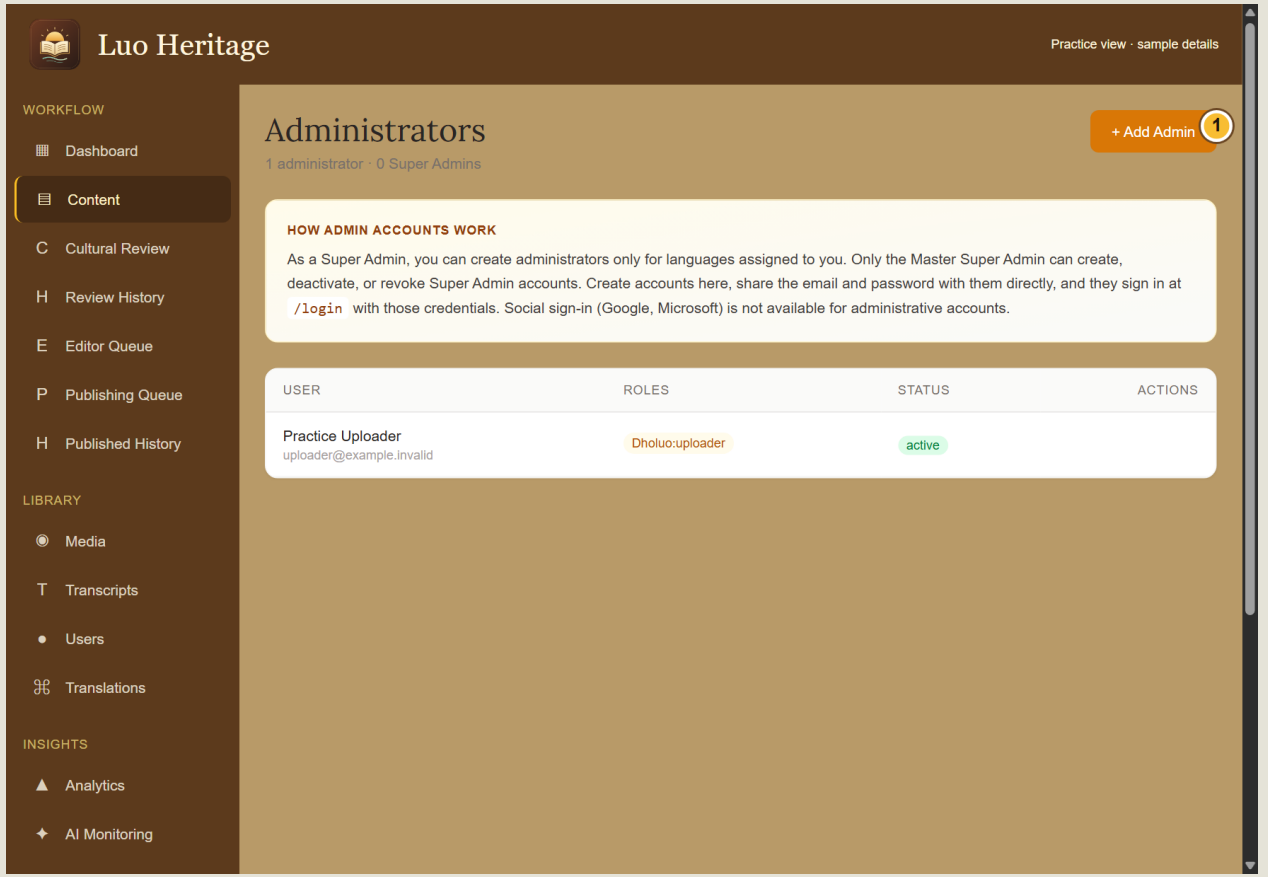

Different people should perform the independent checks. Do not approve your own work.

CHECK: An item may return for changes. Drafts and private approvals are not public publication.

Check staff assignments regularly

1. Open Admins and verify each person’s email, status, language and duty.
2. If a person changes duties, update access through the permitted controls; do not share another account.
3. Read every revoke or deactivate confirmation. Revoking staff duties is different from deleting the person’s account.

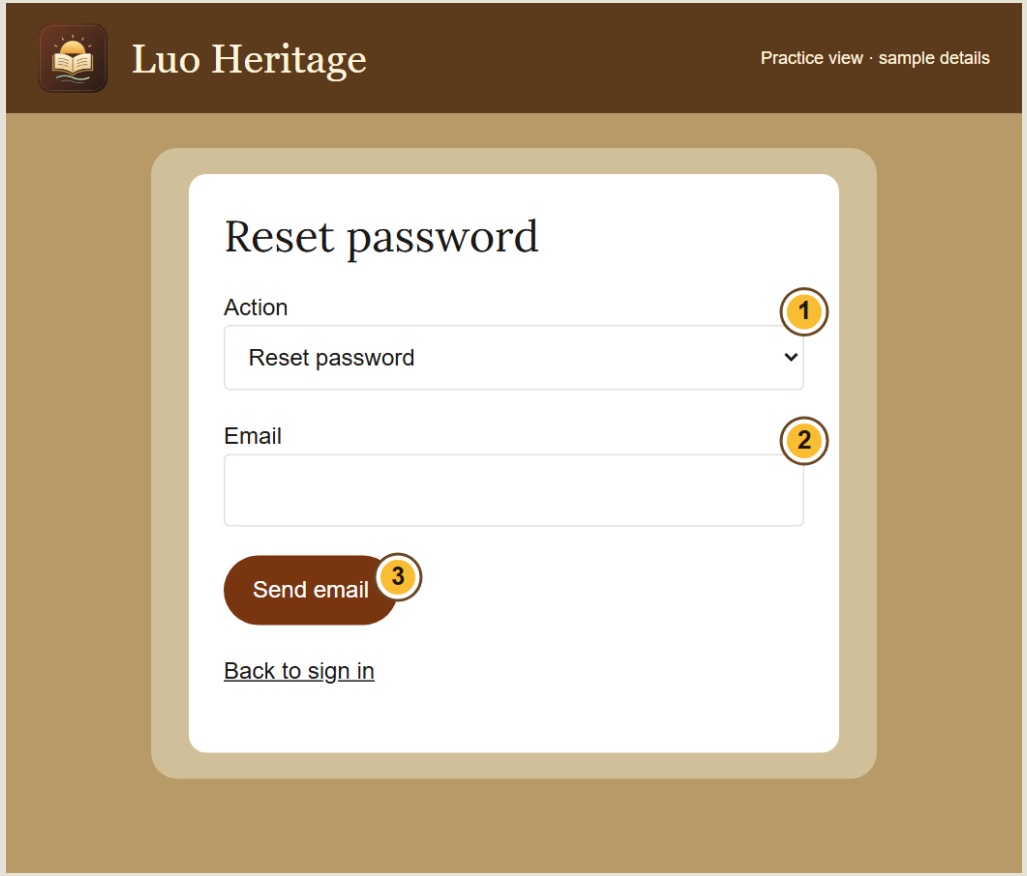

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Staff have the access needed for current work and no unnecessary authority.

Help a user regain access

1. Confirm which email and language they should be using. Do not ask for their password.
2. Guide them to Forgotten password? and the newest email link. Check whether the account is active.
3. If password emails are not being delivered, ask the authorised system owner to check Email settings and the test result.

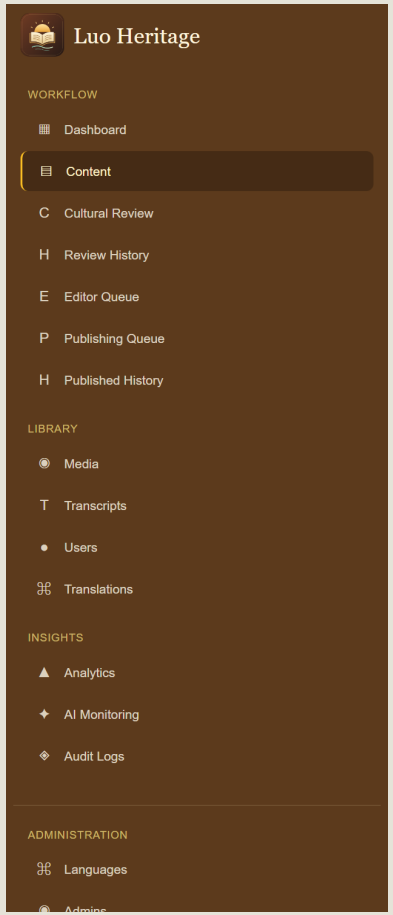

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The user receives the right recovery instructions without exposing their credentials.

Review activity and recorded decisions

1. Use Analytics and AI Monitoring to inspect recorded activity and feedback.
2. Use Audit Logs to see who changed a record or setting and when.
3. Investigate unexpected changes with the responsible staff member. Do not alter evidence to hide a mistake.

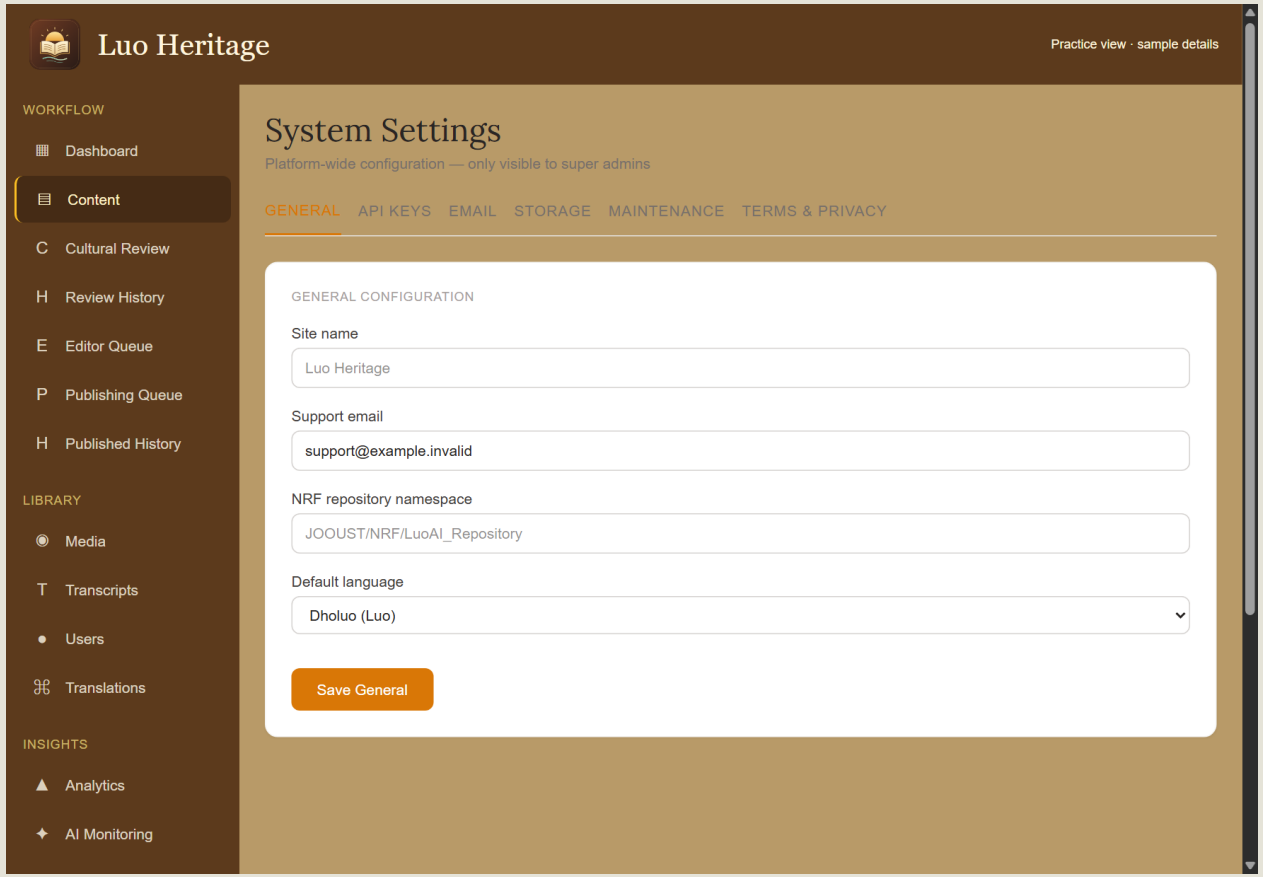

CHECK: You can follow a concern to the relevant person and recorded action.

Use System settings carefully

1. Open System and read the selected tab before changing anything.
2. Change only a setting you understand and are authorised to manage. Save the intended group of settings.
3. Check the result afterwards. For service keys, backup, legal ownership or an unavailable control, contact the Master Super Admin.

Do not include secret service keys in screenshots, slides, email or support messages.

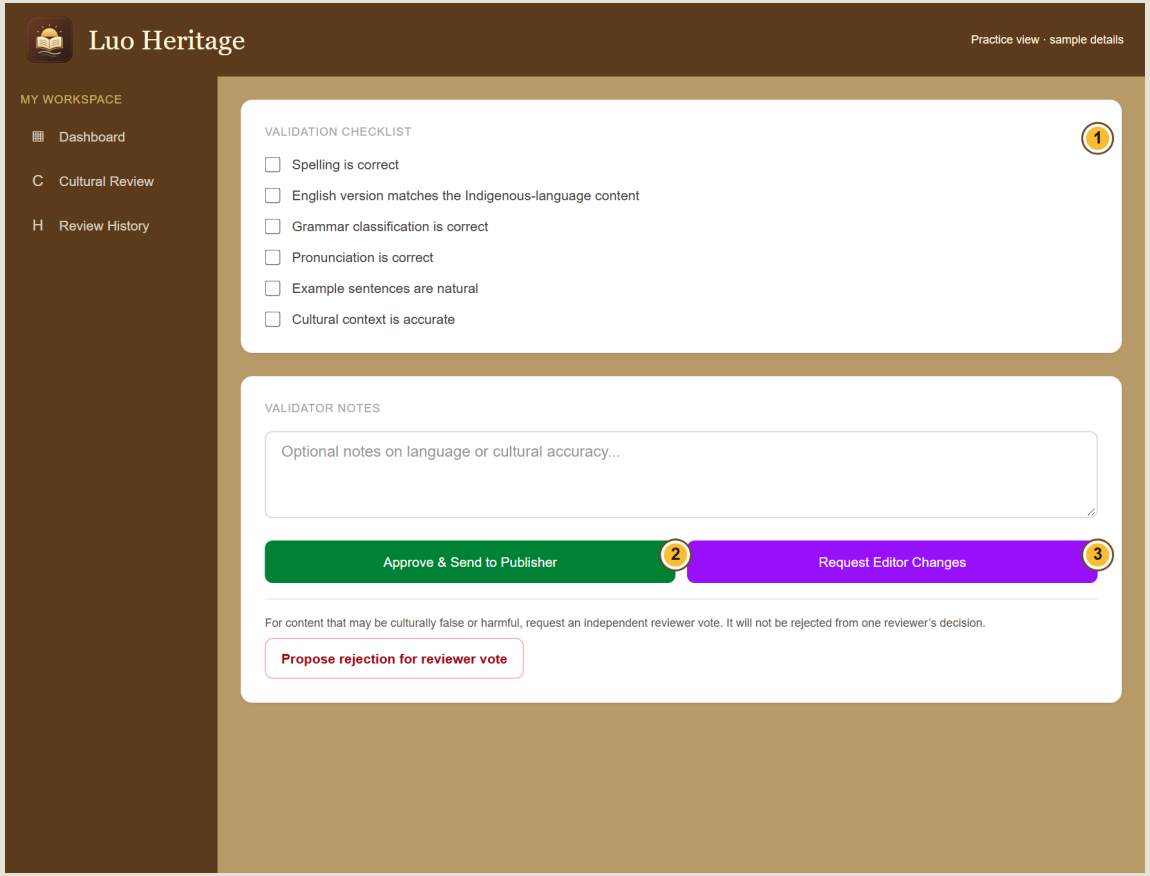

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: A deliberate saved change has the intended effect.

Coordinate content and learning concerns

1. Route incomplete uploads to uploaders, corrections to editors and cultural concerns to reviewers.
2. Ask the assigned publisher to check release readiness. Do not bypass the independent checks.
3. For class work, involve the teacher. Keep learner results and research material private.

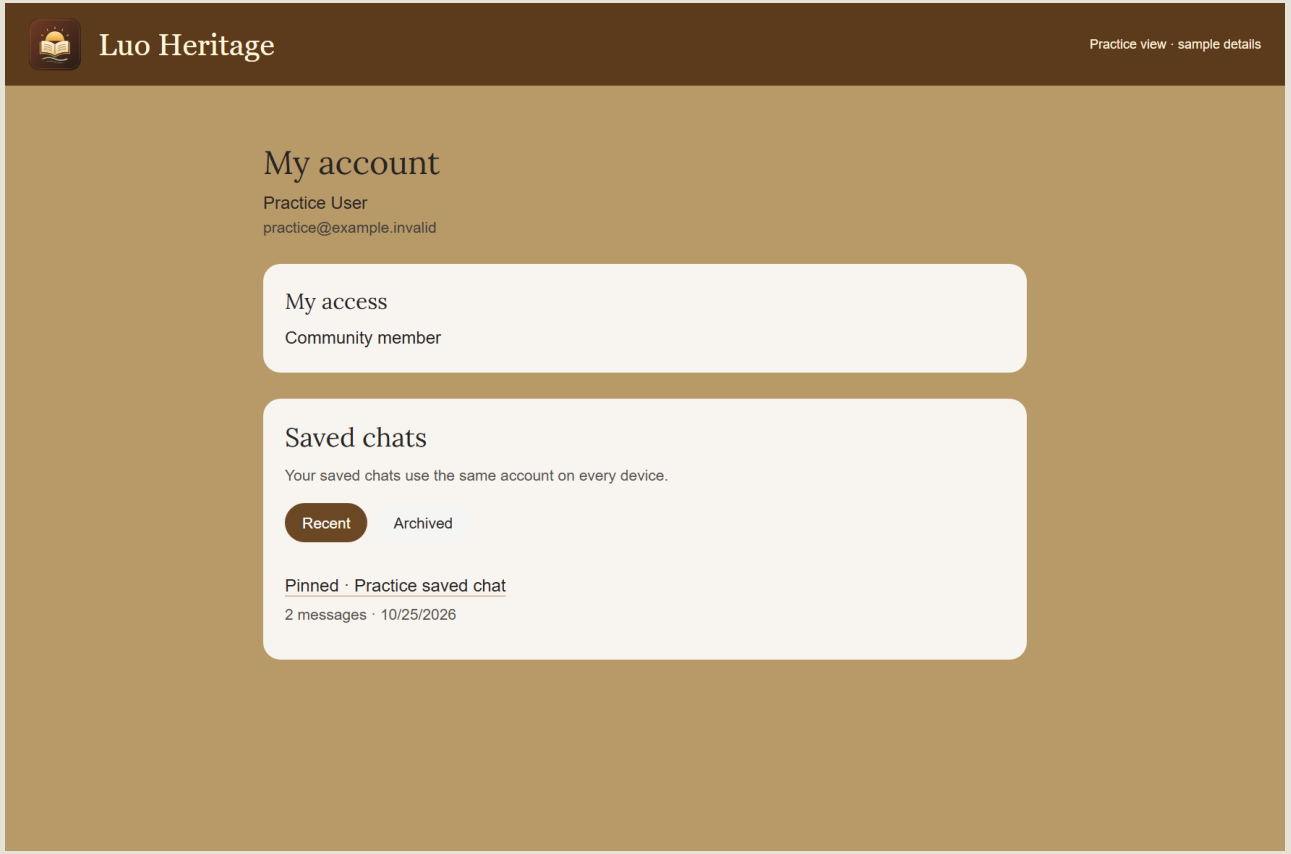

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The right person handles the issue without excessive access.

Protect your account and other people

1. Use your own account. Sign out on a shared computer or phone.
2. Do not copy private interviews, class results or account lists into public chats or messages.
3. If a screen shows information you should not see, stop and tell the account administrator.

Send support the screen name and error message, never your password or a reset link.

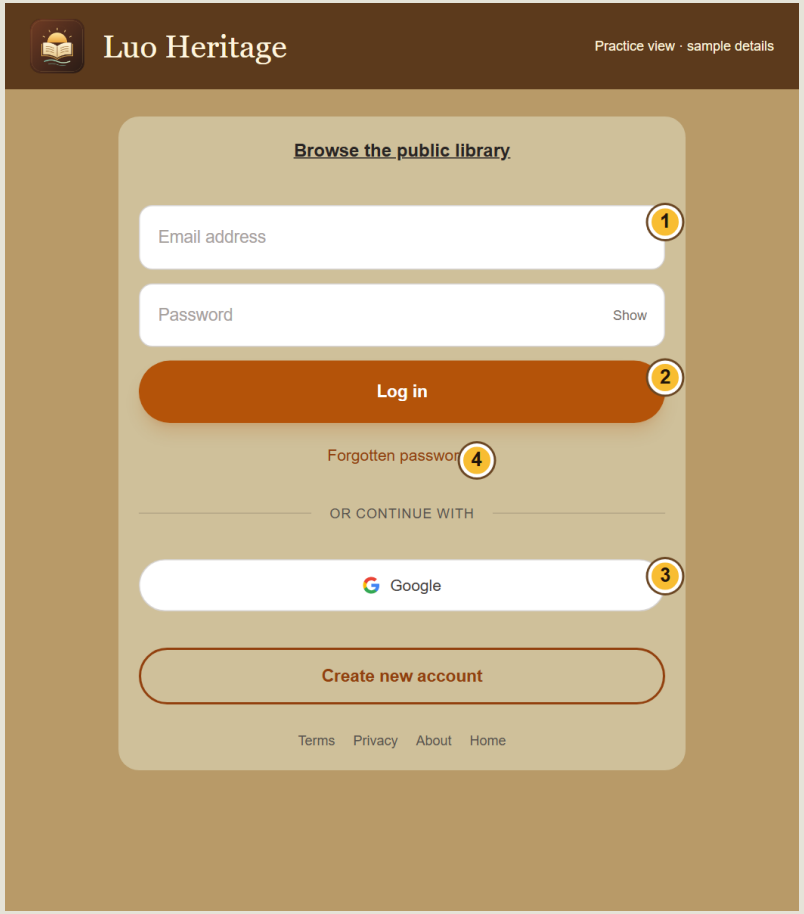

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Your work remains linked to the right person and private information stays protected.

When something does not work

1. Check your internet connection. Read the message on screen before trying again.
2. If your sign-in has expired, sign in again. If a button is missing, ask which role and language you have.
3. If it still fails, note the time, screen, button and exact message. Send these to your account administrator.

Before repeating an upload or submission, check whether the first attempt was already saved.

CHECK: You can explain the problem clearly without exposing private information.

Try it yourself: your readiness check

1. Explain the difference between a Super Admin and the Master Super Admin.
2. Create no live accounts during practice; instead identify the correct role and language in the form.
3. Find the recovery, monitoring and escalation paths for a reported problem.

Try → **Check** → **Ask if unsure**

Use only approved practice material. Do not publish, delete accounts or change live settings just to practise.

CHECK: You are ready for routine work when you can complete these steps without help.
