

LUO HERITAGE / SELF-STUDY SLIDES

LANGUAGE • CULTURE • LIVING MEMORY

Researchers and institutional readers

Find usable sources and respect collection permissions

You will be able to distinguish public reading from authorised research access and request help safely.

READ • TRY • CHECK

25 October 2026 | Edition 1.0

Start here: learn at your own pace

1. Read a slide, try its action, then check the result. Tap means click. Gold circles mark important controls in the screenshots.
2. Use your own account. Your organisation supplies the correct website address and any staff access.
3. Screenshots show the current interface with practice details. Actual names, content and menus may differ.

Read the step → **Try it yourself** → **Check the result**

If your menu looks different, first check My access. Do not ask someone to lend you their account.

CHECK: You will be able to distinguish public reading from authorised research access and request help safely.

What this guide covers

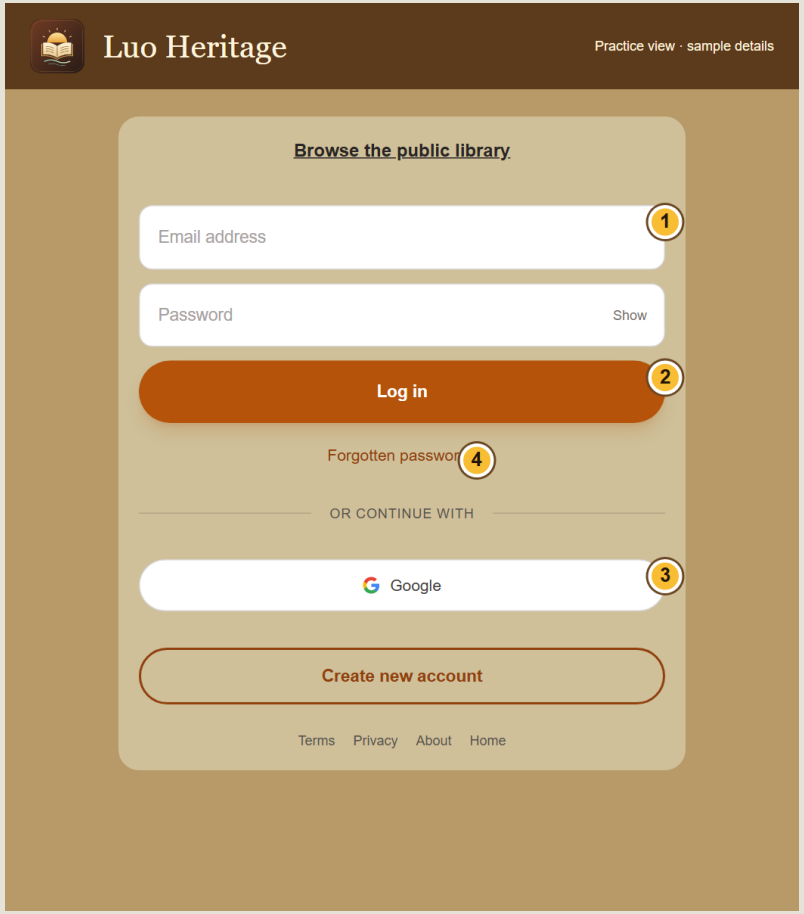

1. Use public collections and sources responsibly.
2. Understand what the researcher interest does and does not allow.
3. Read internal transcripts only when separately authorised.

CHECK: Use the slide numbers to return to a task. The PDF has page bookmarks; PowerPoint has a contents view.

Sign in to your own account

1. Open the Luo Heritage address supplied by your organisation. Choose Sign in or Log in.
2. Enter your email and password, then choose Log in. Check your spelling if it fails.
3. Community members may also use Google. Staff should use the account supplied by their administrator.

Never share your password. Use only an address you trust.

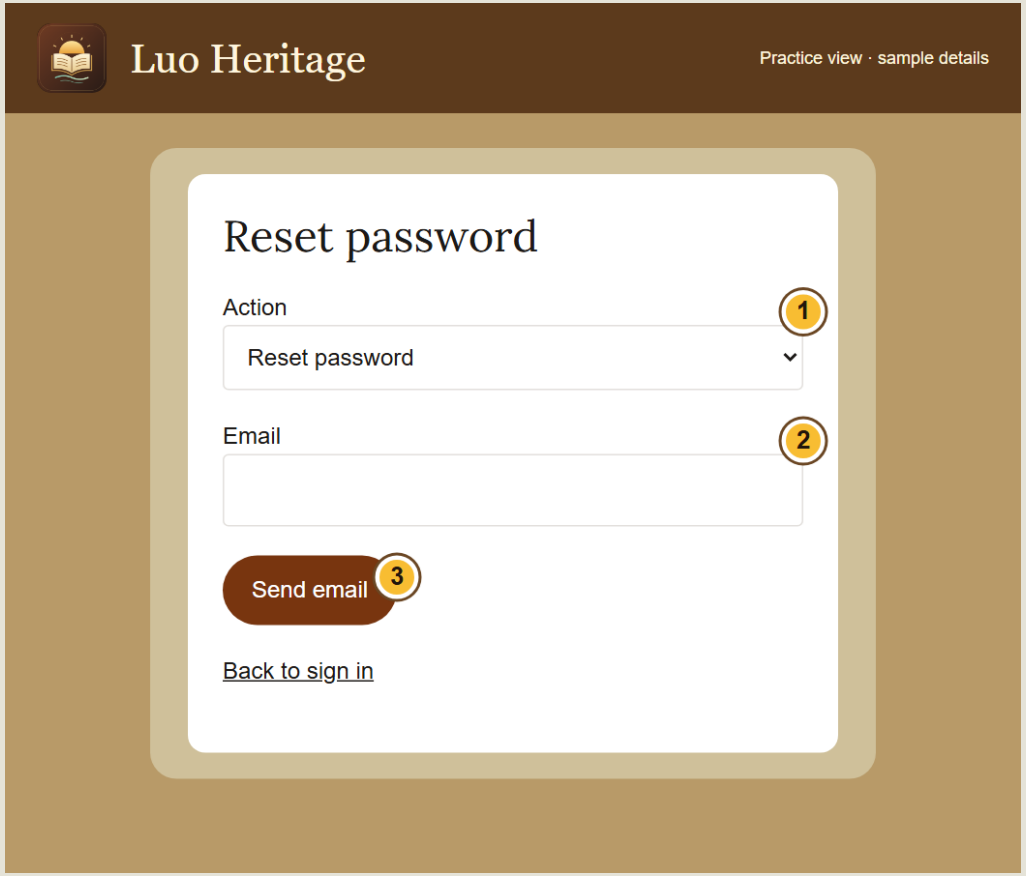

CHECK: Your account or dashboard opens.

Forgot your password?

1. On the sign-in screen, choose Forgotten password? Select Reset password.
2. Enter your account email. Choose Send email, then check your inbox and spam folder.
3. Open the newest reset link within 30 minutes. A link can be used only once.

If no email arrives, contact the person who manages your account. Do not keep requesting links.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: An account email arrives if the address is eligible and the email service is available.

Choose a new password

1. Open the password reset link from your own inbox.
2. Enter a new password of at least 12 characters. A short phrase with several words is easier to remember.
3. Choose Confirm. Return to sign in and use the new password on each device.

Do not forward the reset link. If it has expired, request a new one.

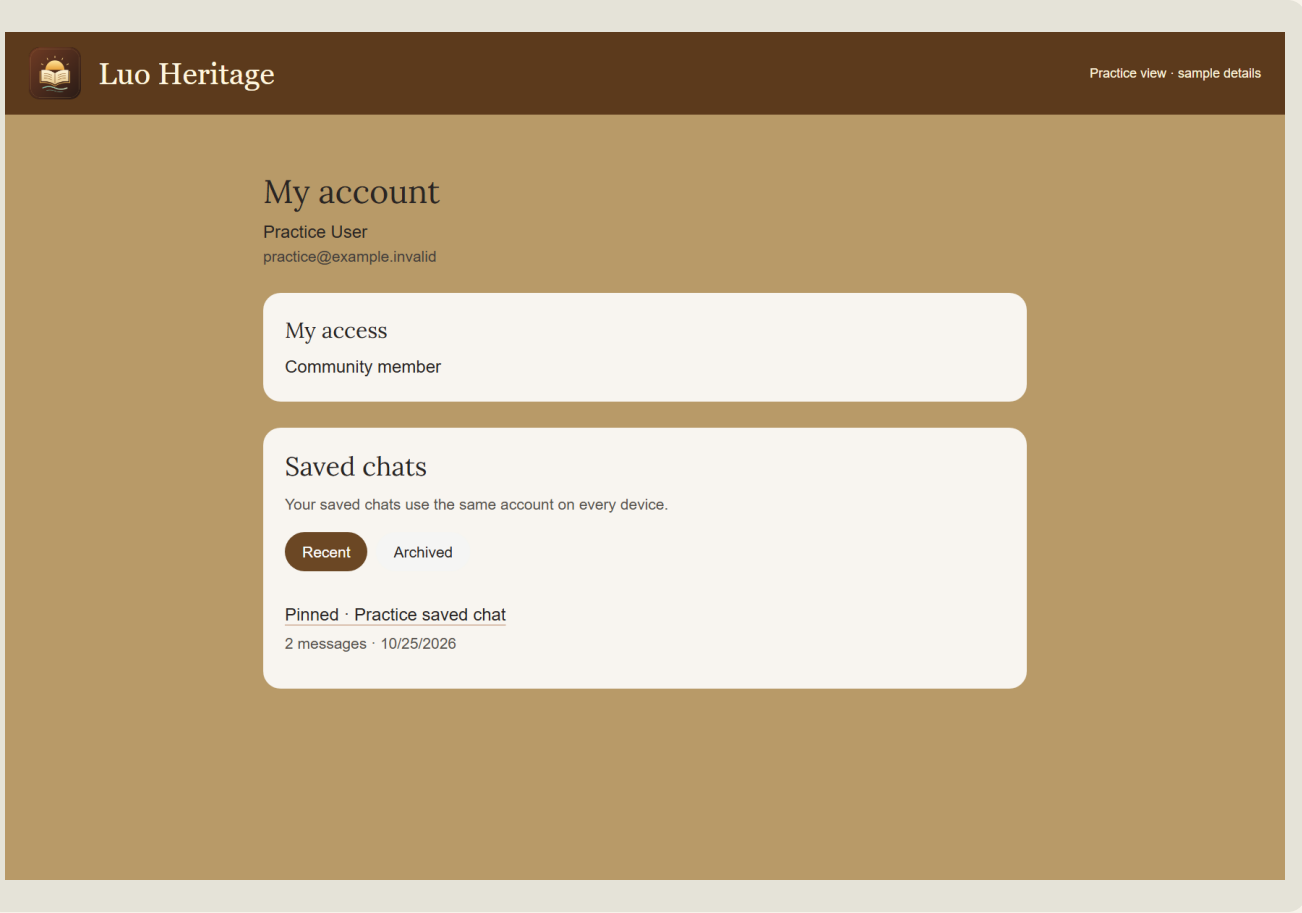

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The password changes and old sign-ins are ended.

Understand your access before you begin

1. A researcher interest describes your purpose. It does not unlock private interviews or staff screens.
2. Start with the public library and approved sources available to ordinary accounts.
3. For internal research material, contact the person responsible for the collection. Use only the access they formally assign.

This guide does not promise a self-service private-dataset download portal.

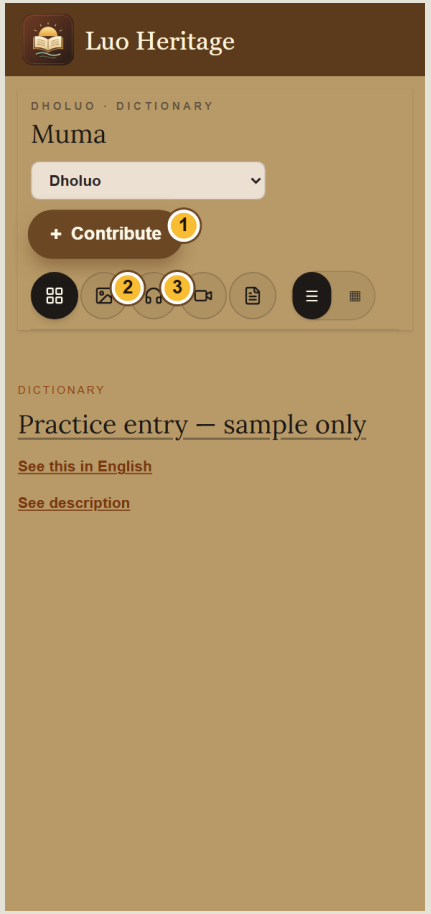

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You know which material you may use without borrowing another person's account.

Use the library on a phone

1. Open a collection, such as Muma (Dictionary), from the menu.
2. Use the picture, headphones, video or page icon to choose a type of content. The four-square icon shows all types.
3. Choose the list or grid button to change the view. Scroll the entries below the controls.

An empty result can mean there are no published entries of that type. Try All.

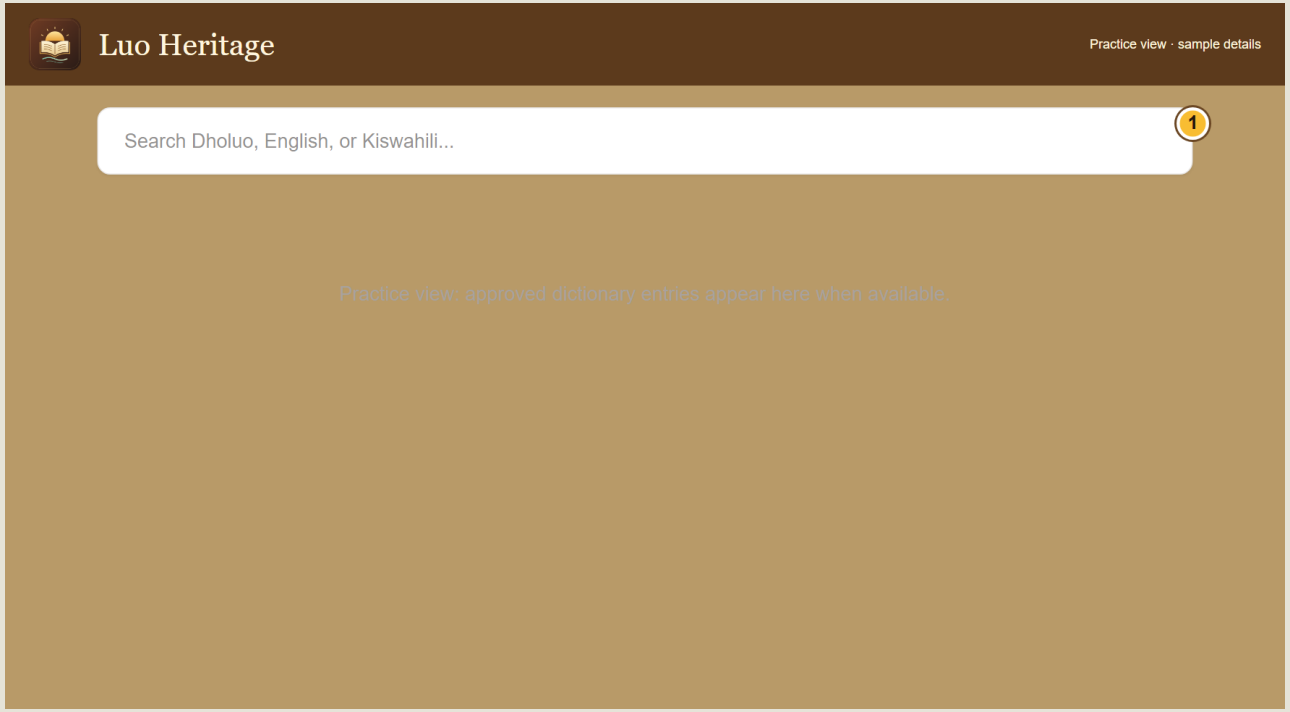

CHECK: The collection shows entries matching your chosen filter.

Find a word in the public dictionary

1. On the public website, open the dictionary page and find its search box.
2. Enter a Dholuo word or an English or Kiswahili meaning. Wait for the results, then read the relevant entry.
3. If there is no result, check spelling or try another word. A missing published entry is not proof that the word does not exist.

The shared app’s Muma screen uses collection filters; it may not show this website search box.

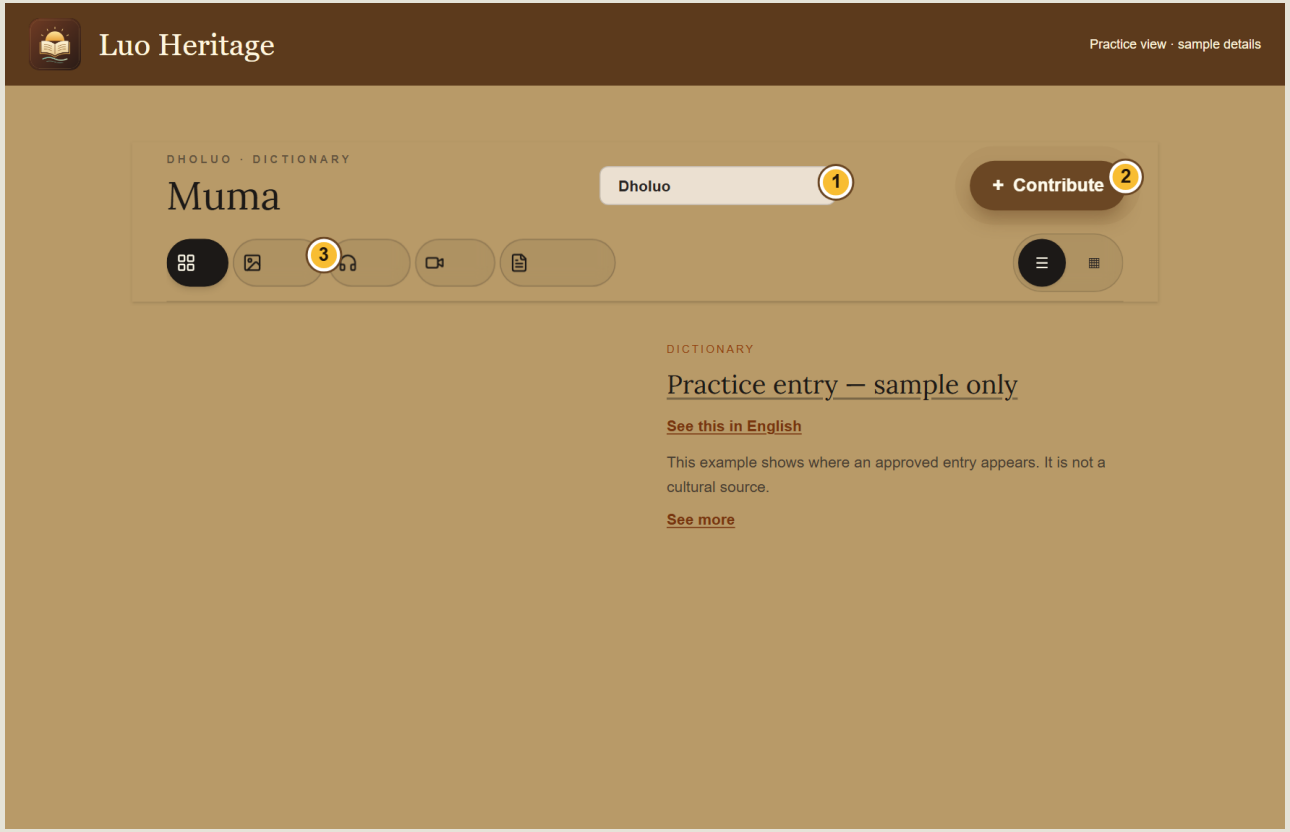

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You can use the dictionary search where it is offered.

Use a source, not only an AI answer

1. Open the approved entry and read its description, language and source credit.
2. For an AI answer, open the cited platform entries and compare the answer with them.
3. Record the source title and permitted reference details for your research notes. Follow the organisation’s citation and reuse rules.

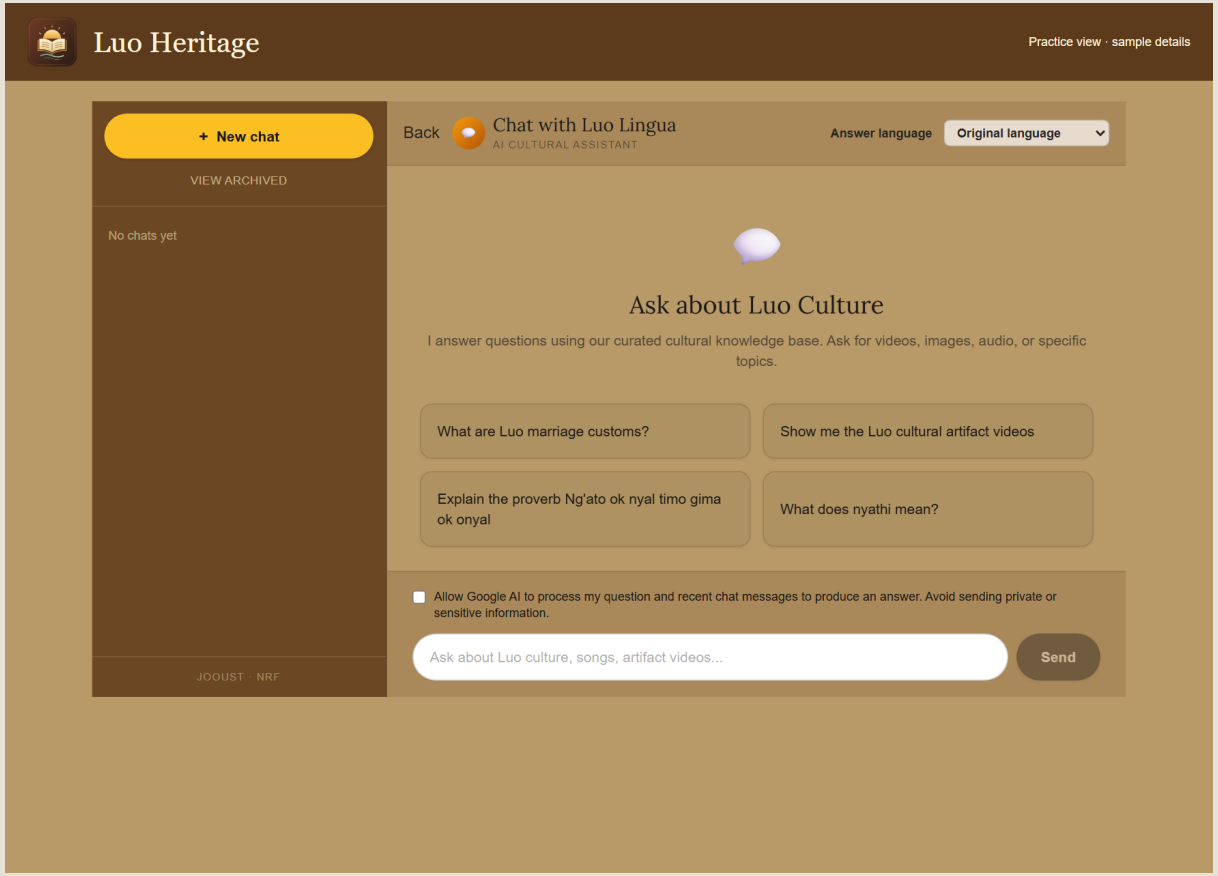

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Your notes refer to actual approved material rather than an uncited generated answer.

Ask the AI chatbot a clear question

1. Open Chat or Chatbot. Choose your answer language and read the processing permission notice.
2. If you agree, allow AI processing. Ask one clear question and wait for the response.
3. Open any sources provided. Ask a follow-up question if you need a simpler explanation.

AI can make mistakes. Do not enter private interviews, passwords or learners' personal information.

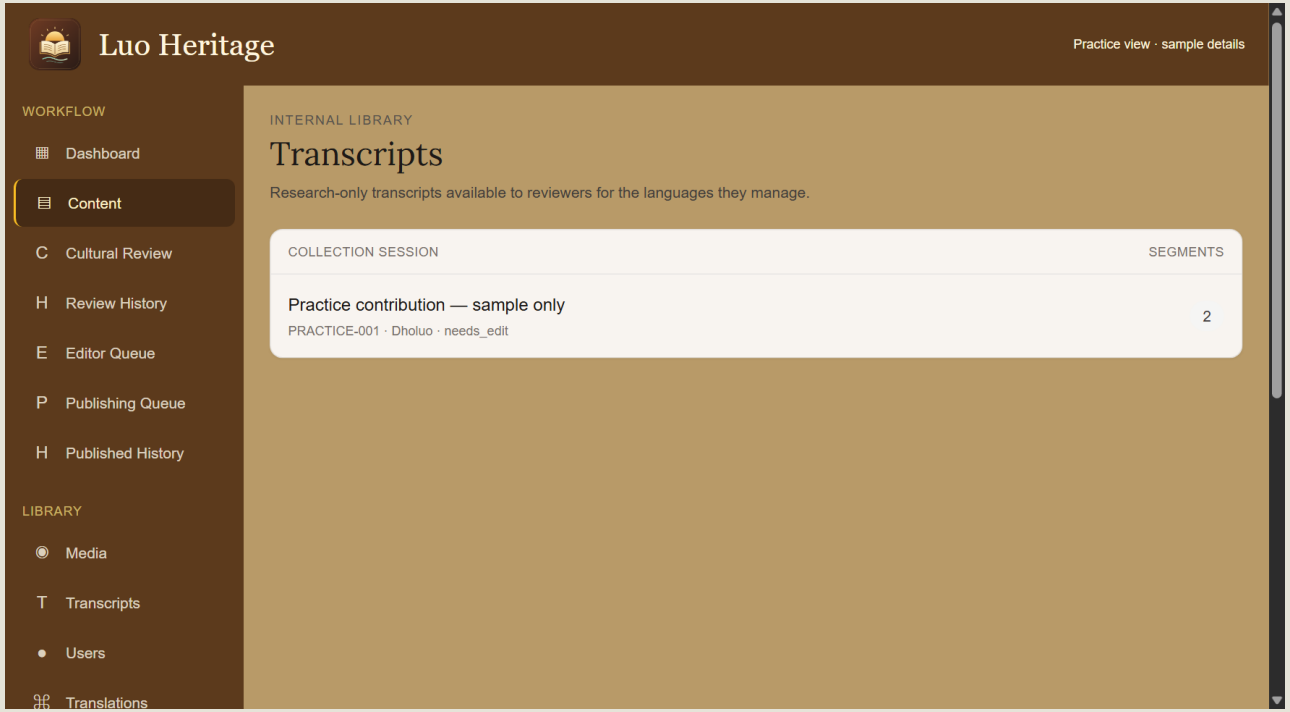

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You can read an answer and inspect any linked sources.

Request private research access properly

1. Describe your research purpose, the collection needed and who will use it.
2. Ask the person responsible for the collection what permission, consent and access conditions apply.
3. Wait for approval. Do not treat a visible title, an imported file or a colleague’s copy as permission to reuse it.

Research-only, teaching and public sharing are different permissions.

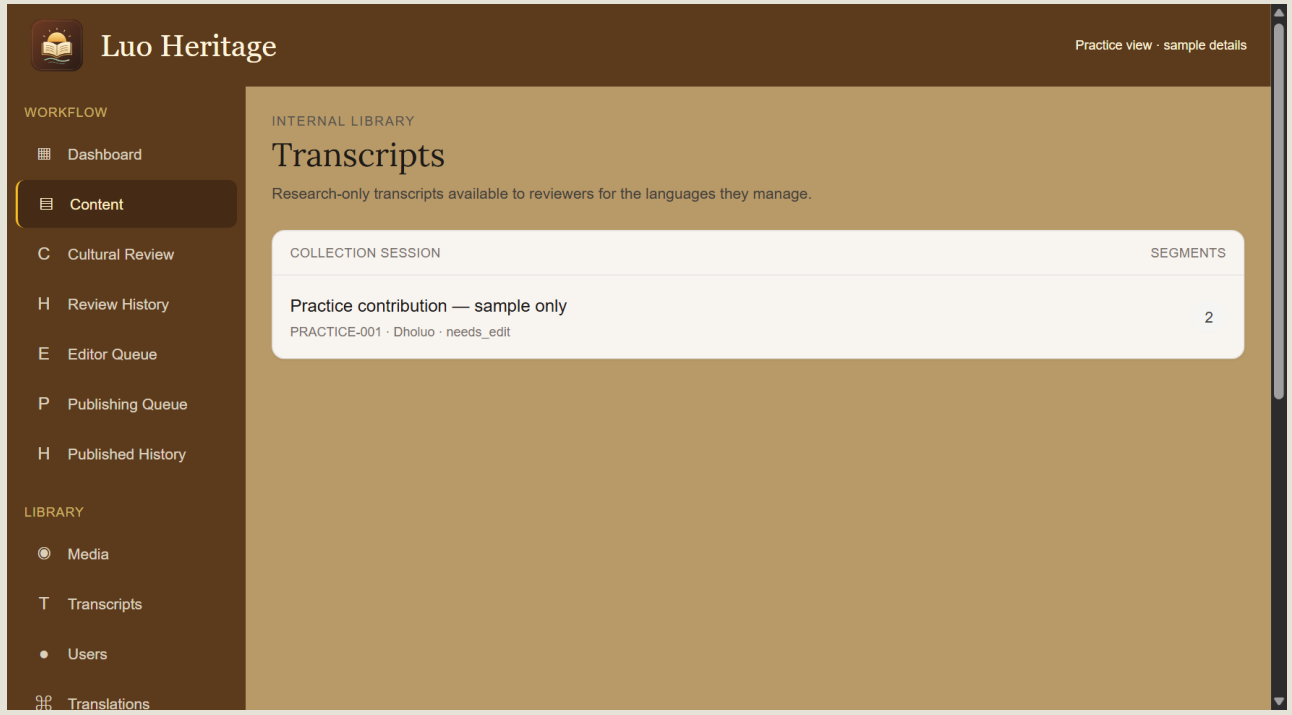

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The access request can be considered by the responsible person.

For authorised reviewers: open transcripts

1. This step applies only if you have separately been assigned a role that can read the internal transcript library.
2. Open Transcripts from the staff menu. Choose the permitted session in your assigned language.
3. Check the session reference and read only the material allowed by your approval.

If Transcripts is missing or access is refused, ask the custodian. Do not try another user's login.

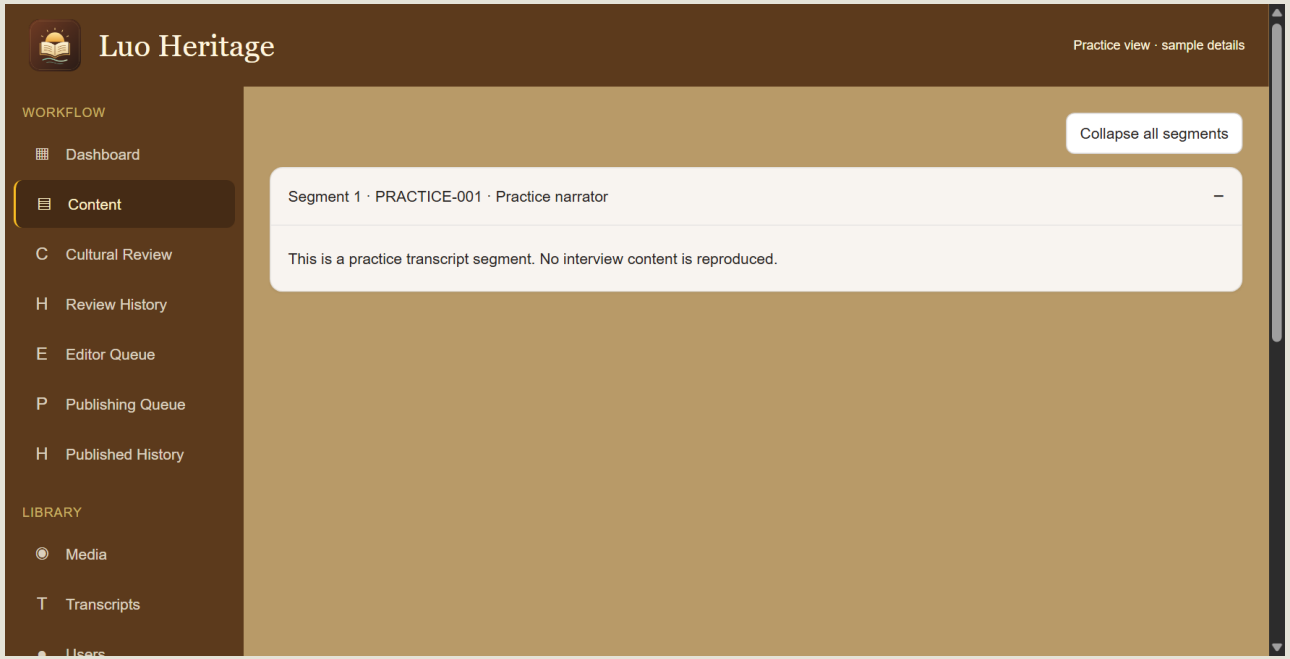

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: An authorised reader reaches the correct internal session.

Read transcript sections carefully

1. Open the permitted session and choose a segment, or Expand all segments.
2. Keep the source reference with your notes. An AI summary is not a replacement for the original text.
3. Do not translate, publish, export or submit internal text to an external AI service without the required permission.

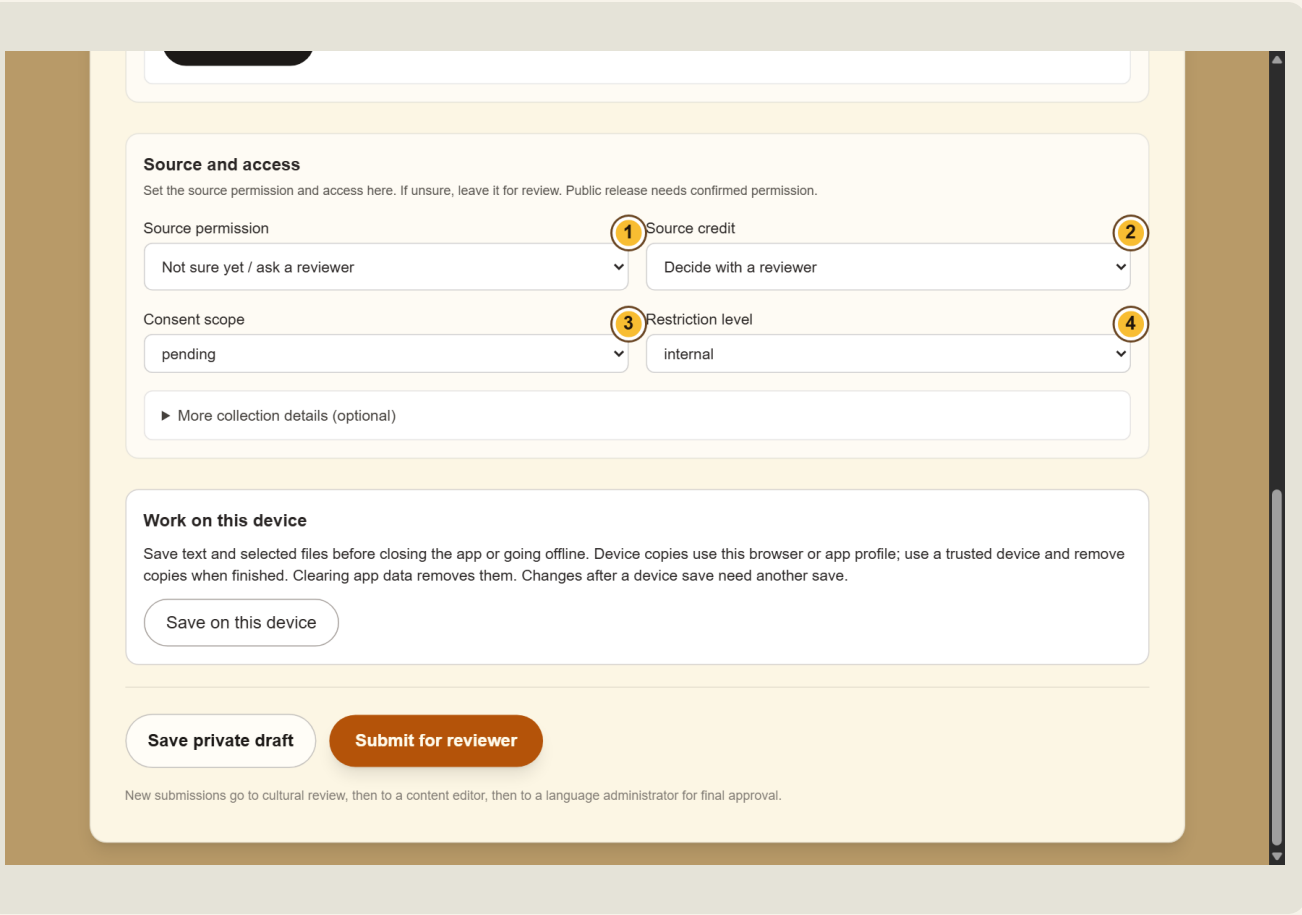

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Your work retains its connection to the permitted original source.

Check permission before sharing

1. Under Source and access, choose Source permission. If unsure, leave Not sure yet / ask a reviewer.
2. Choose how to credit the source. Use a person’s name only when they agree.
3. Keep restricted, sacred or research-only material private. Ask a reviewer before changing access.

Permission to collect material is not automatically permission to publish it.

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The draft records who may use the material and how the source should be credited.

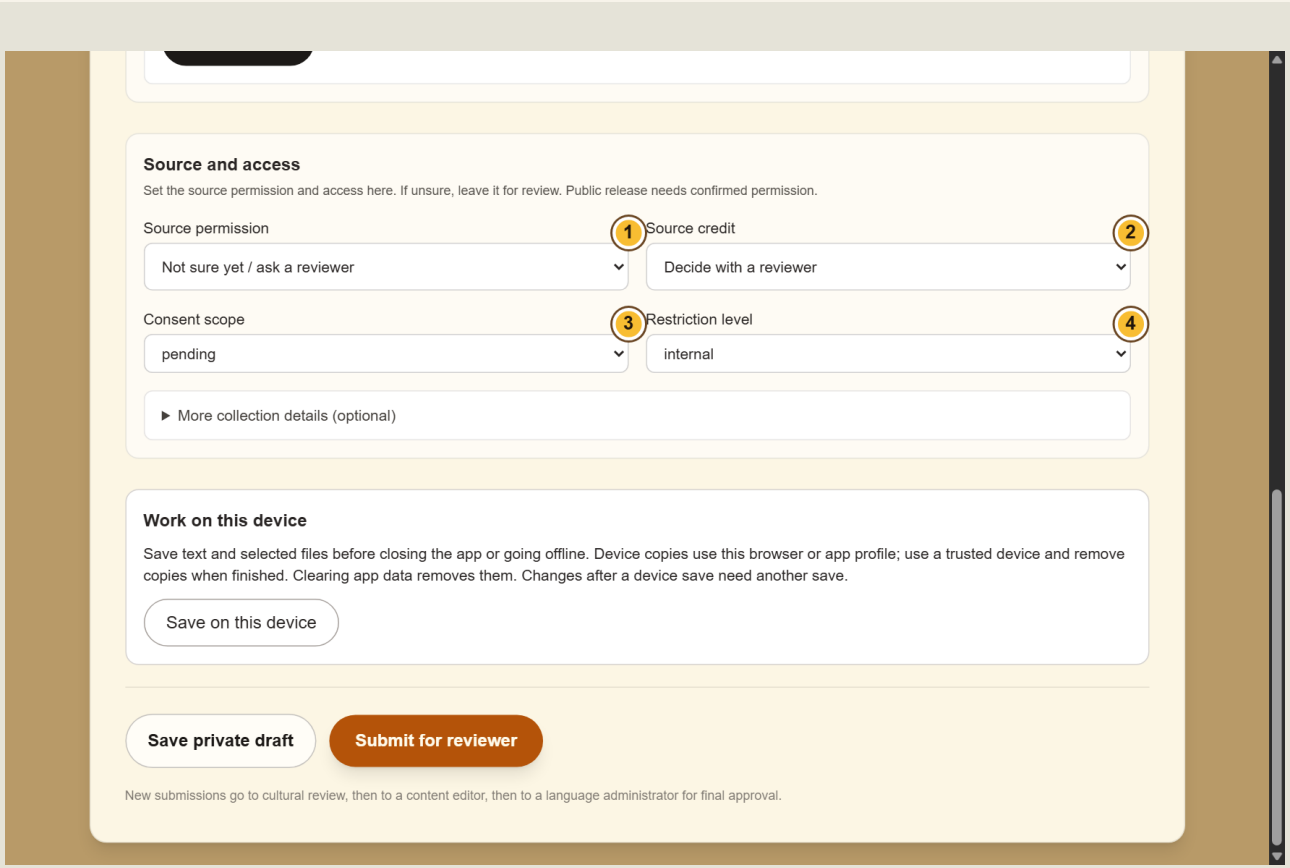

What the permission labels mean

1. Source permission: has the source agreed to the proposed use? Choose Not sure yet when you do not know.

2. Consent scope: what use was agreed? Public excerpt means an approved public part; research only and teaching have different limits.

3. Restriction level: who may see it? Internal and restricted are not public. Sacred material needs the collection owner's special care.

If the permission record is unclear, keep the item private and ask the responsible reviewer.

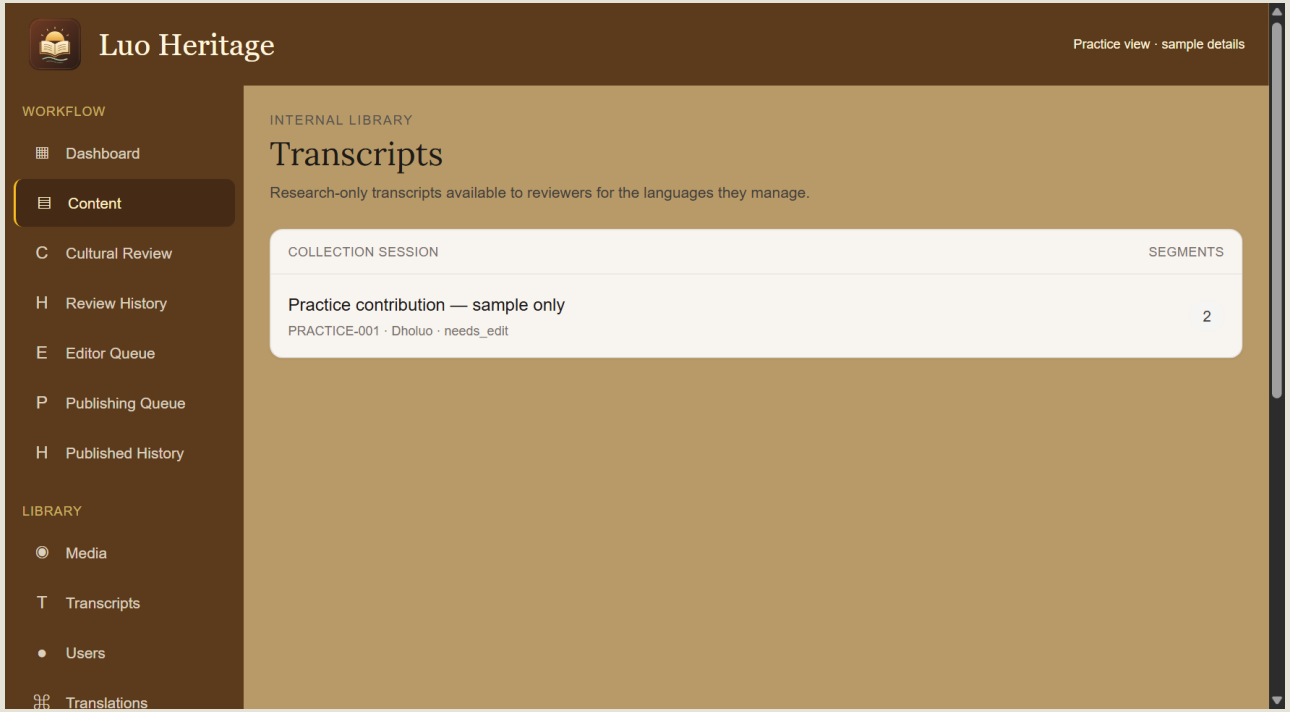

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: You understand the labels before you change them.

Request an export rather than assuming permission

1. Tell the collection owner exactly which records and fields are needed and why.
2. Ask for the approved export and any citation, storage, sharing or deletion conditions.
3. Check the files and permission record together. Keep participant identities and sensitive locations protected.

An administrator’s technical ability to export is not the same as permission for your study.

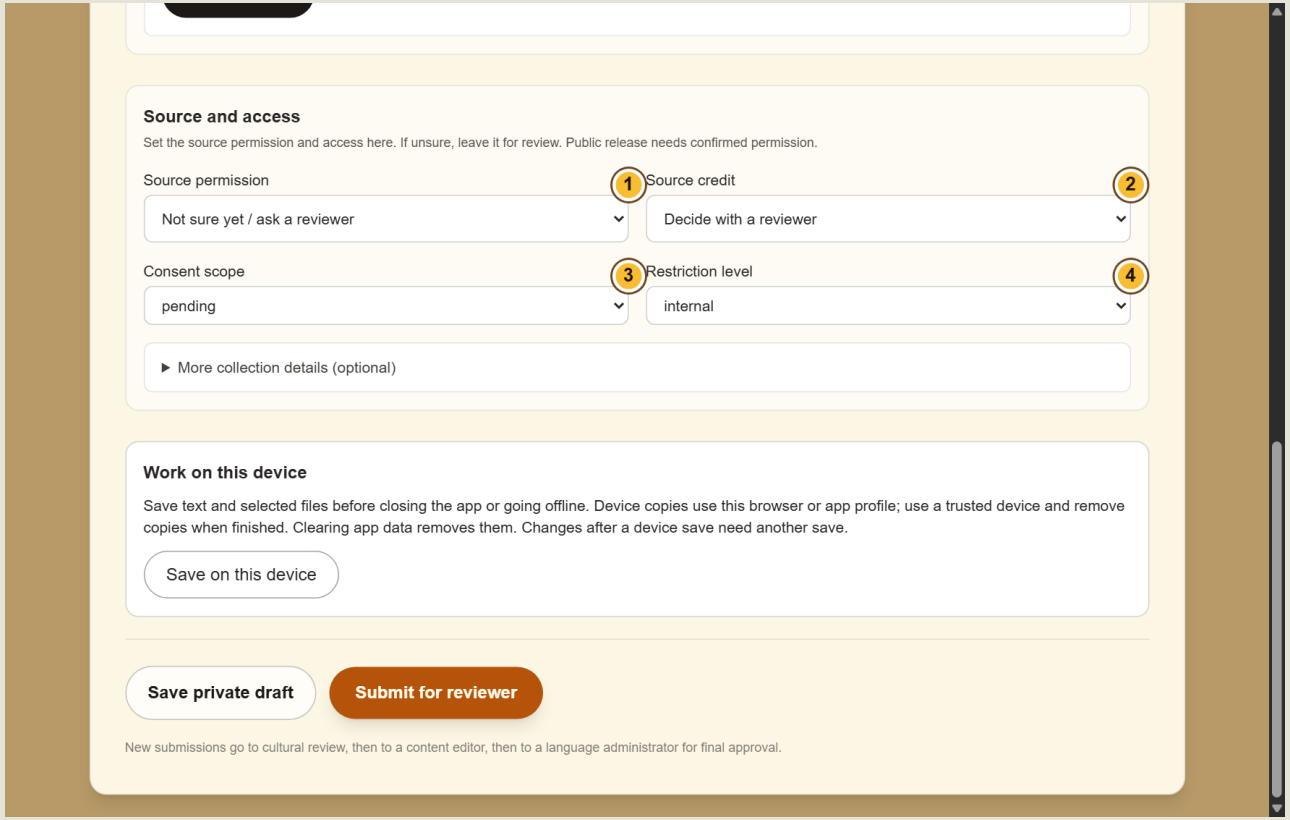

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Any research copy has a documented purpose and agreed conditions.

Report a source or consent concern

1. Note the item title and reference, and describe the concern without copying restricted text.
2. Contact the person responsible for the collection or the administrator who granted your access.
3. Pause any disputed reuse until the responsible person confirms what is permitted.

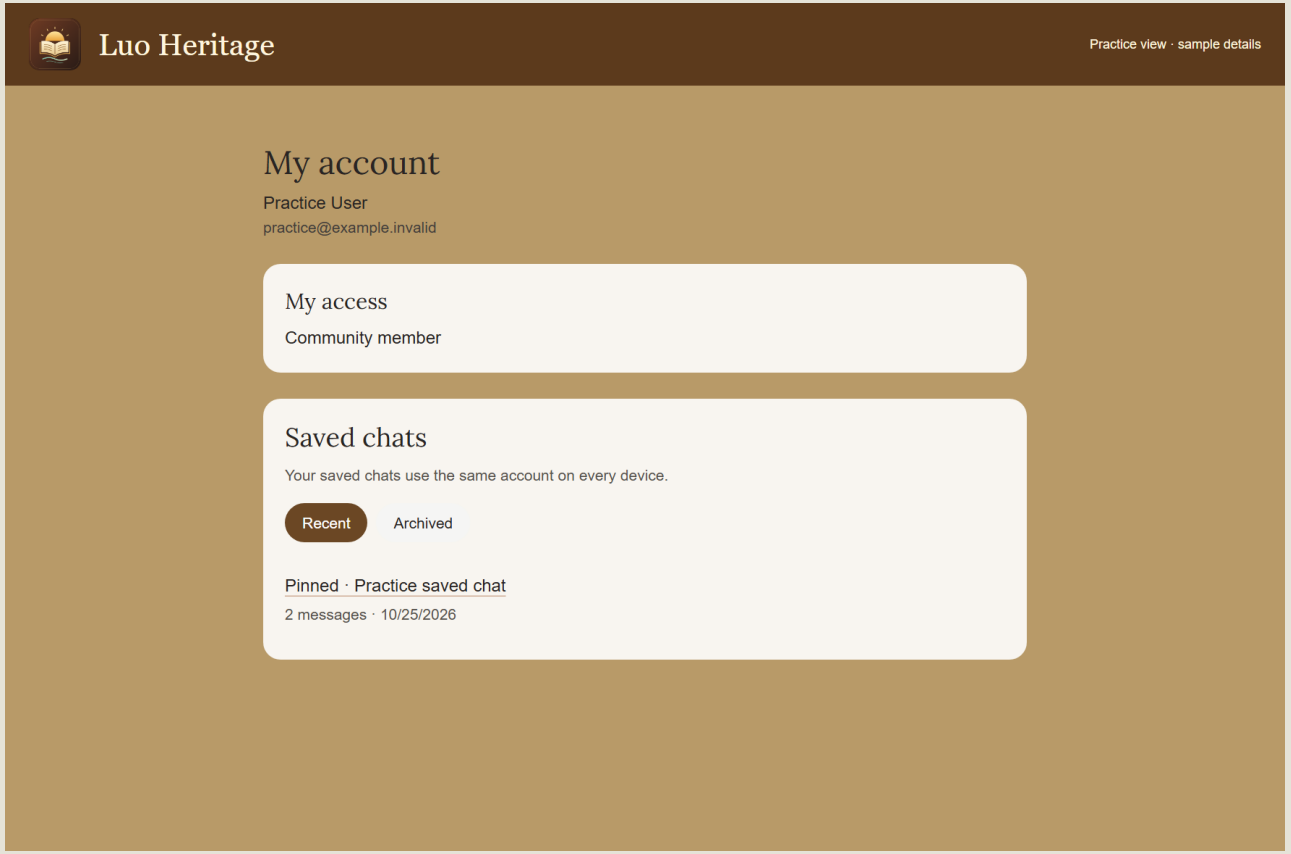

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: The rights concern is handled without spreading the disputed material.

Protect your account and other people

1. Use your own account. Sign out on a shared computer or phone.
2. Do not copy private interviews, class results or account lists into public chats or messages.
3. If a screen shows information you should not see, stop and tell the account administrator.

Send support the screen name and error message, never your password or a reset link.

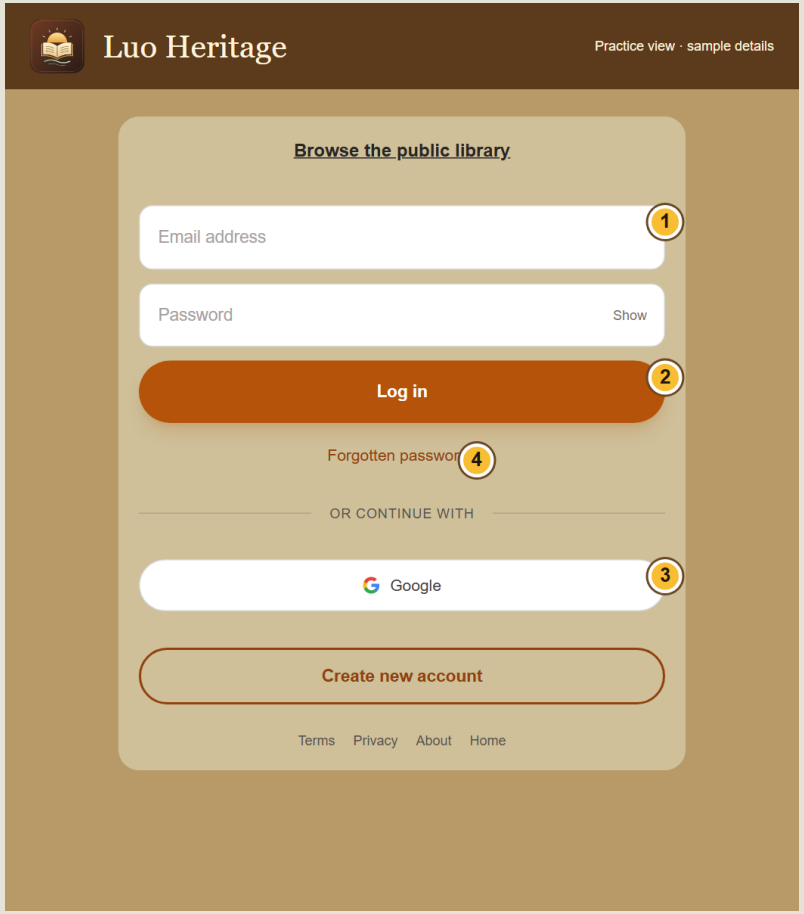

CURRENT INTERFACE • PRACTICE DETAILS

CHECK: Your work remains linked to the right person and private information stays protected.

When something does not work

1. Check your internet connection. Read the message on screen before trying again.
2. If your sign-in has expired, sign in again. If a button is missing, ask which role and language you have.
3. If it still fails, note the time, screen, button and exact message. Send these to your account administrator.

Before repeating an upload or submission, check whether the first attempt was already saved.

CHECK: You can explain the problem clearly without exposing private information.

Try it yourself: your readiness check

1. Find a public source and explain how you would cite it.
2. Explain why the researcher interest does not grant internal access.
3. Describe how you would request a transcript or dataset export and check its reuse conditions.

Try → **Check** → **Ask if unsure**

Use only approved practice material. Do not publish, delete accounts or change live settings just to practise.

CHECK: You are ready for routine work when you can complete these steps without help.
